AI DESIGNED THIS AD.

This ad is a demonstration of how Design, AI and Technology can come together to make a thing of beauty.

But it's not just skin-deep. This stunning cityscape design featuring a train system offers a glimpse into the not-too-distant future.

This is how SUTD leverages Design, AI and Technology to redefine higher education and research, fostering innovator leaders and empowering transformative innovations, all the while incorporating sustainability as we address real-world challenges.

“

Justin Chee Jia Wei

■ Head of Product Strategy, Smart Mobility (Roads & Services), ST Engineering
Graduated from the Master of Innovation by Design programme

I have unleashed my creativity and elevated my skills with the design tools learned from the Master of Innovation by Design programme. Through collaboration with my peers from diverse backgrounds, we have transformed innovative ideas into market-tested blueprints.

Chia Yew Ken

■ SUTD Alibaba EDB Industrial Postgraduate Programme (EDB-IPP) PhD Student

Being a student in the EDB-IPP programme at SUTD and collaborating with Alibaba DAMO Academy has offered invaluable mentorship, allowing me to delve into advanced academic research and gain practical insights into generative AI applications within the industry.

Durga Baskar

■ Master of Science in Technology and Design Programme (Cybersecurity) Student

The MTD programme has been a great experience. The professors are incredibly approachable and supportive, fostering a collaborative learning environment. I truly enjoy being part of this programme and feel well-prepared for my future career.

”

TRAILBLAZING A BETTER WORLD BY DESIGN.

Experience future-forward learning through SUTD's Masters and PhD programmes including our signature Master of Science in Technology and Design (MTD) programmes. By intertwining Design, AI and Technology, SUTD positions you to be at the forefront of tomorrow's industries, today.

Interdisciplinary Legal Education In a New Era of Diversification

CITY CAMPUS

INTERNATIONAL
FACULTY MEMBERSLEADING RESEARCH
RESOURCESSEMINAR-STYLE PEDAGOGY
AND SMALL CLASS SIZE

SMU Yong Pung How School of Law is distinguished by its unique pedagogy in equipping students with fundamental knowledge and skills specific to the legal practice. The SMU Juris Doctor and Master of Laws programmes connect law with business, finance, and new technologies to produce graduates adept at collaborating across different industries. SMU's academically and professionally well-established faculty is unrivalled in their passion and commitment towards research excellence and engagement with the legal profession. On top of that, the SMU city campus located in the heart of downtown Singapore offers students not only the ease of transiting between work, home, and school, but also a bustling backdrop for social activities.

SMU Juris Doctor Programme

SMU Juris Doctor (J.D.) is a postgraduate degree for aspiring practitioners of law. This robust programme will comprehensively expose students to interdisciplinary and applied practices in the legal landscape. Through the core modules and rich electives of the JD programme, students can not only achieve knowledge of law, but also improve critical thinking, professional judgements, and presentation skills.

5 FACTS ABOUT JURIS DOCTOR

Professional Law Degree

A full-time professional law degree for graduates of any discipline.

Exclusive basis

All core law modules are taught in classes exclusively for JD students only.

Diverse Student Background

JD students hail from different disciplines and work experiences, thus promoting a rich exchange of diverse perspectives.

Qualifying Law Degree

With a GPA of ≥ 3.0 points, graduates can take the Singapore Bar exam.

Choice to value-add to your JD degree

In the course of the JD programme, students can choose to complete another SMU MBA degree, or the Dual JD Programme with Yonsei University, or the JD-LLM Programme with Bocconi University.

smuyphsl

Master of Laws Programme

The SMU LLM programme is carefully designed to expand legal knowledge in classic and novel areas of the law, while simultaneously equipping you with the skillsets essential to render on-point advice on cross-border transactions or deliver high-quality adjudication and judicial administration results. Tracks available in the programme are:

Judicial Studies Track

- In partnership with the Singapore Judicial College
- Designed specifically for serving judges and judicial aspirants

Cross-Border Business and Finance Law in Asia Track

- Gain a double-edged legal and business advantage
- Acquire knowledge in cross-border data transaction, financial regulation, international business, investment, wealth management etc.

Law and Technology Track

- Unique interdisciplinary studies on the latest legal and regulatory issues
- Cutting-edge technologies in Data Management, AI, Blockchain, and Fintech etc

5 FACTS ABOUT MASTER OF LAWS

Advanced Law Degree

1-year full-time or 2-year part-time postgraduate programme.

Non-Law Professionals Welcome

Designed for cross-disciplinary specialisation, with about 20% of each cohort hailing from diverse non-legal fields.

Cutting-edge Curriculum

Incorporating the latest research and best business practices, the curriculum includes study tours to leading companies, organisations, and law firms.

Networking Opportunities

Connect with legal, business, and banking practitioners to gain insights into possible career pathways.

Interactive Pedagogy

Experience a stimulating, multi-disciplinary exploration while cultivating analytical, collaborative, and communication skills.

Hear About JD and LLM Alumni Stories

Drawn from various national, educational, and professional backgrounds, our JD and LLM students embody the multicultural blend of the Asia Pacific.

As a partner, I communicated with related parties to discuss not only legal issues, but also tax, accounting, finance, and other related business practices. I became aware that what clients wanted were practical legal solutions that informed their business decisions. These experiences encouraged me to learn more about Asian laws, especially when adopting common laws, which are the standard among international commercial transactions. The LLM classes were made up of motivated students from all around the world, many with substantial legal backgrounds. I was glad to be around excellent classmates and teammates, without whom I would not have completed all the tasks that we were required to work on.

*Koji Umai (Japan), Class of 2019, LLM Programme
Lawyer, One Asia Lawyers, Indonesia*

I opted to pursue the specialisation in 'Cross Border Business and Finance Law in Asia' during my LLM. Over the course of ten months, I acquired a wealth of new knowledge regarding emerging and topical legal fields such as IP Law, international transactions, financial markets, monetary policy, digital economy, fintech, and more. Having come from a Civil Law background, it was an intellectually stimulating experience to be immersed in the Common Law world and its ways of thinking about legal problems. I appreciate the new perspectives that I have acquired as a result of analysing factual matrices according to the relevant laws under both systems.

*Lai Yi-Ann (Taiwan, China), Class of 2019, LLM Programme
Partner, Chien Yeh & Associates, Taiwan*

Many businesses between Korea and Singapore require Singapore legal advice for construction, shipping, cryptocurrency, and other commercial contracts. There are only a few Koreans able to provide such advice in Korean as one needs to be qualified to practise Singapore law. SMU JD programme formed the foundation of my practice. The curriculum covered the essential theoretical aspects of each area of law encountered in my work. It was also a way for me to meet local practitioners. Group projects were also one of the highlights at SMU that required students to cooperate and bounce off ideas. I was able to make friends quickly and learned a lot from different classmates.

*Mimi Ahn (Korea), Class of 2014, JD Programme
Associate Director, Focus Law Asia, Singapore*

Be prepared to embrace diversity, as not all of your classmates will be fresh graduates and may have a different impression of university life. The diversity of the SMU JD programme brings colour to the seminar room each day. You will gain invaluable exposure to perspectives that are crucial to the application of law, many of which you may not have considered before. Your JD classmates, with their diverse backgrounds, will further enrich your learning experience. The SMU JD curriculum offers flexibility, allowing you to potentially accelerate your studies and complete Law School in just 2-2.5 years, instead of 3 years.

*Leow Jiamin (Singapore), Class of 2014, JD Programme
Partner, WongPartnership*

The SMU Juris Doctor programme was an intensive and rigorous education that surpassed all my expectations. I particularly appreciated the focus on classroom interaction, the perspectives of classmates with different backgrounds, and the quality of the experienced faculty, including leading practitioners. It provided an excellent education in the practice of law and was perfect preparation for life first as a Justices' Law Clerk and now as a lawyer in private practice.

*Chew Xiang (Singapore), Class of 2012, JD Programme
Partner, RAJAH & TANN Singapore LLP*

Master of Laws Law and Technology

Interdisciplinary Legal Education In a New Era of Diversification

Recent decades have witnessed the exponential growth of new technologies that will bring about fundamental changes to our society in the decades to come. These technological developments are not only reshaping how legal services are delivered but also calling for innovative legal and regulatory frameworks to promote their positive impacts on advancing social welfare.

The SMU LLM in Law and Technology track is the first of its kind, at least in Asia-Pacific. The new track will focus on three cutting-edge areas of technology development, data transmission, AI application, and blockchain application, as well as their interactions with law, regulation, and public policies. The fundamental objective of this new track is to get legal professionals familiar with the technologies for future legal services, and to forge a common foundation for legal professionals, tech engineers and business players to understand and communicate about a benevolent institutional framework of future technological applications.

Technopreneurship and Innovation Programme

Master of Science | FlexiMasters

An entrepreneurship programme deeply rooted in the technological ecosystem

The MSc TIP stood out among other MBA programmes. Instead of a top-down approach to prepare graduates to manage well-established institutions, the MSc TIP is ground-up and value creation driven. As starting my own company and own brand was always at the back of my mind, the MSc TIP appealed to me.

Jason Lee, MSc TIP Class of 2010
Founder, Scent By SIX
Prestige's 40 under 40 Laureate in 2020, Singapore Prestige Brand award 2020/2021

Taking on FM TIP provided me with the skills to effectively communicate with mentors and peers from different industry backgrounds and I was able to thus gain valuable insight into founding companies and the financing required, which will be helpful for business expansion in the future.

Ng Shan Shan Kiffany, FM TIP, MSc TIP Class of 2023
Director & Marketing Director, Hong Kong Hung Kam Limited, Hung Lam Development Co.

MSc TIP is exactly what it stands for - it is not just about entrepreneurship but technopreneurship. A combination of technology with entrepreneurship attracted me.

Angelina Terlaki, MSc TIP Class of 2021
Co-Founder, Red Dot Analytics
Forbes 30 Under 30 Asia 2023 - Enterprise Technology

OUR PROGRAMME

MASTER OF SCIENCE IN TECHNOPRENEURSHIP AND INNOVATION

Focusing on educating and nurturing leaders for the entrepreneurship ecosystem, our Master of Science in Technopreneurship and Innovation Programme (MSc TIP) empowers participants with competency to leverage on technology to create social and economic value for society.

With emphasis on experiential learning, MSc TIP integrates emerging technologies with innovative business models and practices into its curriculum. The course covers strategic and operational issues of entrepreneurial ventures at different growth stages.

Throughout the programme, participants will have opportunities to engage with many stakeholders in the entrepreneurship ecosystem. Over 2,000 alumni in more than 100 major cities and 30 countries around the world have benefitted greatly from this programme and many of them turned their entrepreneurial ideas into successful ventures.

HONE YOUR SPECIALIST SKILLS

WITH POSTGRADUATE PROGRAMMES AT SIT

Singapore Institute of Technology (SIT) is Singapore's University of Applied Learning, offering applied degree programmes targeted at growth sectors of the economy. With a mission to nurture individuals who positively impact society, SIT aims to be a leader in innovative learning by integrating learning, industry and community.

Postgraduate Offerings

SIT postgraduate programmes enable students to develop specialist knowledge and skills relevant to the industry. Whether you aim to advance in healthcare as an allied health professional or nurse, or achieve chartered status as an engineer, SIT provides the comprehensive education and hands-on experience needed to reach your career goals.

Master of Science in Civil Engineering

Master of Science in Mechanical Engineering

Master of Science in Electrical and Electronic Engineering

Master of Health Sciences

January
2025 Intake

September
2025 Intake

Features of Master Programmes

Specialised curriculum designed to meet industry demands.

Provide skills-based education and training to working professionals who wish to upgrade themselves.

Pedagogy comprises technology-enabled learning using a mix of lectures, hands-on computer-aided industrial design exercises and micro-project assignments.

Modules are offered as evening classes*. Students are expected to complete the programme over a normal candidature period of 2 years.

*Classes may run in the day for MHSc programme.

Master of Science in Mechanical Engineering

The Master of Science in Mechanical Engineering, a 60-credit postgraduate programme offered by SIT, is an excellent option for working professionals seeking to be Chartered Engineers (CEng) and/or Professional Engineers (PE).

This programme is a mandatory requirement to be eligible for consideration for Chartered Engineers (CEng) in Singapore, UK and Washington Accord Signatory countries and/or Professional Engineers (PE) in Singapore.

The Master of Science in Mechanical Engineering is a merger and rename of the Master of Engineering Technology in Sustainable Infrastructure Engineering (Land) programme and Master of Engineering Technology in Sustainable Infrastructure Engineering (Building Services) programme, both of which were granted full accreditation by the Engineering Accreditation Board.

Programme Highlights

Two specialisations:
Sustainable Building Technology and Sustainable Land Transport

The specialisation of Sustainable Building Technology focuses on Construction Management using Building Information Modeling; Acoustics Engineering; Lighting Technology for Building Services; District Cooling Systems.

The specialisation of Sustainable Land Transport focuses on Systems Engineering for Urban Railway Systems; Asset Management and Maintenance Engineering; Remanufacturing Systems Management; and Project Management.

“

With the increasing emphasis on technology and innovation, there is a growing demand for professional mechanical engineers in the built environment and land transport industry sectors. The industry-focused Master of Science in Mechanical Engineering prepares you with strong theoretical knowledge and practical skills in Sustainable Building Technology or Sustainable Land Transport, thereby enhancing your professional competencies and career advancement opportunities and widening your professional practice locally and globally.

**Associate Professor Andrew Ng Keong,
Programme Leader, Master of Science
in Mechanical Engineering, SIT.**

From theory to practice: The transformative power of Doctor of Business Administration Degrees

Dr Geoff Parkes
Doctor of Business Administration
Programme Director
Aston University

Dr Geoff Parkes is Associate Professor in Marketing and Strategy at Aston Business School and Programme Director for the Doctor of Business Administration (DBA). Following a career in industry he graduated himself with a DBA in 2015. His research interests are in the fields of international marketing strategy and entrepreneurship and manages several knowledge transfer partnerships (KTP's) for the University. Prior to his career as an academic, Dr Geoff's background is as a marketing and strategy practitioner. He is formerly the Sales & Marketing Director of Aga Cookers and Armitage Shanks.

In recent years, the Doctor of Business Administration (DBA) has gained recognition as a prestigious qualification, equipping aspiring business leaders with the expertise needed to tackle complex challenges in the corporate world. Aston University's DBA programme exemplifies the flexibility and relevance that DBA degrees provide for today's dynamic business environment, accommodating the busy schedules of professionals.

DBAs: Bridging Theory and Practice

DBA programmes, akin to other doctoral programmes, require candidates to explore advanced business topics and contribute original research through their theses. What distinguishes DBA graduates is their ability to connect theory with practice. They are trained to apply their extensive knowledge to real-world business problems, making them invaluable to their employers. DBA students typically enhance existing models with innovative applications, generating new knowledge for both academia and practice.

What sets apart universities and business schools offering these programmes is a team of academic supervisors and faculty who combine scholarly rigour with practical business experience—an essential factor for students choosing their institutions.

According to the Global DBA Survey by Compass¹, a typical DBA candidate has an impressive 15 years of professional experience upon entering the programme. Many DBA students complete their research while holding middle or upper management positions, demonstrating their commitment to career advancement and expertise development. Their theses often address live work issues requiring this level of rigour.

Rising Educational Expectations

In the rapidly evolving business landscape of the 21st century, businesses seek leaders who can adeptly navigate new challenges without extensive training. While a Bachelor's Degree combined with professional experience was once sufficient, the demand for more advanced qualifications has surged. The Master of Business Administration (MBA) has become the new entry-level degree, with DBA degrees elevating candidates even further. A recent report by EFMD Global² indicates that DBAs are on a growth trajectory, with 86% of institutions expecting increased enrolments soon. Career advancement and reputation are key motivators for those pursuing this qualification. The main driving factors include career transformation (81%), the ambition to achieve the title of Doctor (76%), and the need for research with managerial impact (71%).

Data from the National Center for Education Statistics (NCES)³ reveals a significant increase in the number of Business Degrees awarded. From 2001 to 2016, Bachelor's Degrees in business surged by 30.9%, while Master's Degrees increased by 38%. Despite this growth, DBA Degree holders remain relatively rare compared to those with Bachelor of Business Administration (BBA) and MBA Degrees, reflecting the unique academic rigour and specialisation offered by DBA programmes.

Business as an International Language

The global spread of DBA education is a recent phenomenon, with many programmes established in the last decade. This trend spans across various regions, with Compass's Global DBA Survey⁴ showing 42% of programmes based in Europe, 28% in North America, and 22% in Asia. DBA programmes impart business knowledge that transcends borders.

The survey also highlights an 80% increase in demand for DBA programmes worldwide, with no region experiencing decreased interest. The Middle East and Asia have seen

MSc in Financial Technology

SCAN ME

in @NTUMScFintech
f @NTUMScFintech
o @ntu.msc.fintech

Led by industry experts and renowned academics in our programme, you will gain a comprehensive understanding of blockchain systems, decentralised finance, robo-advisors, natural language processing, machine/deep learning, FinTech entrepreneurship, and more. Engage in hands-on projects and real-world case studies to cultivate the practical expertise, agility and creativity demanded by this exciting industry. Whether you envision yourself revolutionising payment systems, optimising investment strategies or reimaging customer experiences in financial services, our MSc in FinTech programme is your launchpad.

The "Intelligent Process Automation (IPA)" specialisation (previously known as "Artificial Intelligence" track) is designed for the students who are interested in the technical aspects of Financial Technology. The candidates opting for IPA specialisation should have a good bachelor's degree in a quantitative major or have a good track record in mathematics and programming subjects (especially for non-science/ engineering graduates).

The "Digital Financial Services (DFS)" specialisation (previously known as "Operations and Compliance" track) is designed for students who are interested in the managerial aspects of Financial Technology. The candidates opting for DFS specialisation should have a good bachelor's degree in a relevant programme (e.g., quantitative majors, business, etc.) or relevant working experience in the finance industry.

DEVELOPING LEADERS THROUGH TOP-TIER EDUCATION PROGRAMMES!

Hear from our Students & Alumni

Jeremy John Cordeiro

Executive Master of Business Administration
University of Newcastle, Australia, Class of 2023
APAC Business Development Manager, Bentley Systems

One of the aspects that I found particularly compelling in this programme is the inclusion of modules like mindful leadership, a unique offering not commonly found in other Master's degree programmes. This unique feature demonstrates the programme's commitment to preparing students for real-world challenges.

Muhamad Ismail bin Abdol Rahim

Master of Analytics
Massey University, Class of 2021
Enterprise Sales Engineering, Snowflake

Through the programme, I am able to root my understanding in the current landscape that businesses function. It is a multi-disciplinary programme that will essentially empower recent graduates and working professionals, from non-technical and non-quantitative backgrounds, to use Analytics.

Carmen Lim

Master of Science in Cyber Security
Coventry University, Class of 2023
Security Professional, British Telecom Singapore

Coventry University offered modules that suited to my interest and fit the path I wanted to pursue. During my studies, lecturers would ask me how I was doing in my modules and my work whenever I bumped into them. After graduating, I am still in contact with some of my lecturers, such as Mr. Gregory, who was very supportive of my classmates and I till this day. I am very grateful for their efforts, which motivated me to continue pursuing what I love and have passion for. Despite being one of the 'rare' young female engineer, I feel I am right where I belong.

ESSEC Business School

ESSEC Business School, Asia-Pacific
5 Nepal Park, Singapore 139408
Tel: (65) 6884 9780, Email: essecasia@essec.edu
Website: www.essec.edu/asia
CPE Reg. No.: 200511927D
Reg. Period: 30 June 2023 to 29 June 2029

Background

A leading pioneer in education since 1907, ESSEC is ranked #9 business school in Europe by the Financial Times and holds the prestigious "triple crown" accreditation from AMBA, EQUIS and AACSB. We offer a wide range of top-ranked programs that provide strong global exposure, professional networks and career outcomes. Students can choose to study in 3 continents via our global campuses in Singapore, France and Morocco. In helping our graduates advance their professional aspirations, we have produced business leaders who helm some of the world's most influential organizations such as Accenture, PwC, UBS, Chanel, L'Oréal, and Van Cleef & Arpels.

Programme Highlights

Ranked top 5 worldwide and #1 in Singapore and Asia in the FT and QS rankings, our Master's programs in finance, management, business analytics and data science are a winning blend for career success and global prestige. They are also rated #1 in Singapore for employability, value and alumni outcomes in the QS Business Masters Rankings 2024.

Tailored for senior executives, the ESSEC & Mannheim Executive MBA Asia-Pacific is designed to address the demands on senior management operating in Asia via its innovative curriculum, inclusive learning approach, and a pan-Asian core with a global reach. Ranked #15 globally by the Financial Times, the modular program is delivered in person over 15 months, with 10 segments in Singapore and 2 international residences in Mannheim and Washington DC. The program offers a unique platform to build an international network with classmates from across Asia and Europe.

Duke-NUS Medical School

8 College Rd, Singapore 169857
Email: admissions@duke-nus.edu.sg
Website: https://duke-nus.edu.sg

Background

Duke-NUS is Singapore's flagship graduate entry medical school, established in 2005 with a strategic, government-led partnership between two world-class institutions: Duke University School of Medicine and the National University of Singapore (NUS). Through an innovative curriculum, students at Duke-NUS are nurtured to become multi-faceted 'Clinicians Plus' poised to steer the healthcare and biomedical ecosystem in Singapore and beyond. A leader in ground-breaking research and translational innovation, Duke-NUS has gained international renown through its five signature research programmes and 10 centres. The enduring impact of its discoveries is amplified by its successful Academic Medicine partnership with Singapore Health Services (SingHealth), Singapore's largest healthcare group. This strategic alliance has spawned 15 Academic Clinical Programmes, which harness multi-disciplinary research and education to transform medicine and improve lives.

MD Programme Highlights

The Duke-NUS Doctor of Medicine (MD) programme embraces a pioneering "Clinicians First, Clinicians Plus" educational philosophy, guiding graduates to first become competent and patient-centered clinicians before advancing their other capabilities to become clinician-scientists, innovators, educators and leaders.

Quick Facts Box

Name of Programme:	Doctor of Medicine (MD)
Total Cost:	<ul style="list-style-type: none"> Singapore Citizens: SGD 49,050 (GST subsidy provided) Singapore Permanent Residents: SGD 63,600 (GST subsidy provided) International Students: SGD 85,700 (inclusive of GST)

Centre for Professional and Continuing Education, Nanyang Technological University (PaCE@NTU)

50 Nanyang Avenue, NS1-05-01, Singapore 639798
Website: https://www.ntu.edu.sg/pace

Centre for Professional and Continuing Education

Background

In collaboration with NTU's renowned colleges, institutes, centres, industry partners, and SkillsFuture Singapore, PaCE@NTU is committed to providing lifelong learning opportunities for individuals seeking personal and career growth.

PaCE@NTU offers a wide range of programmes, including NTU Master's Degrees by Coursework, FlexiMasters, Graduate Certificates, Specialist Certificates, SkillsFuture Career Transition Programmes, and Professional Development Courses. These programmes are designed to equip learners with the skills needed to thrive in their careers.

In addition, PaCE@NTU offers insightful and relevant courses and programmes such as Regional Executive Programmes and Corporate Training. These are tailored to meet the needs of organisations aiming to equip their workforce with essential skills to remain competitive in the ever-changing global landscape. Our expansive range of programmes caters to multiple skill levels across various industries. Furthermore, we offer Student Immersion Programmes for overseas students to learn while experiencing Singapore's culture.

Highlights

Unlock your potential with over 80 industry-relevant NTU Master's Degrees by Coursework. Renowned for academic excellence and supported by world-class faculty and state-of-the-art facilities, NTU offers a diverse array of programmes designed to equip graduates with practical skills and knowledge. Our strong emphasis on industry relevance ensures that you are prepared to excel in today's dynamic professional landscape.

Choose from a breadth of specialisations offered by various colleges and schools within NTU, spanning six areas of excellence: Digitalisation and Digital Transformation, Sustainability and Sustainable Development, Healthcare Innovation and Management, Creative Technologies and Media, Business Venture and Innovation, and Education and Learning Technologies. This interdisciplinary approach to education allows you to tailor your learning experience to meet the demands of your chosen field.

Beyond academic rigour, NTU fosters a vibrant campus life and a robust alumni network, enriching your educational journey with valuable connections and opportunities. Scholarships and financial aid options are available to support your academic aspirations, making NTU a compelling choice for those seeking to advance their education and career prospects.

Background

Our English Graduate Programmes are designed for learners at different stages of their career. Regardless of your experience, we will expand your horizons, challenge conventional wisdom, and think critically about the pressing issues of our time. We will provide you with the knowledge and resources to make a meaningful impact, improve decision making and contribute to the betterment of societies, wherever you are.

By incorporating real-life case studies and experiences into the curriculum, our programmes equip students with the most current and practical skills and knowledge to address national issues and stay ahead of the trends.

Programme Highlights

Gain in-depth knowledge on topics across related areas in digital governance, artificial intelligence, decision making, governance, policy design and implementation, amongst others, from one of the best institutions in the world.

Benefit from a holistic learning experience with a rigorous and focused curriculum delivered by a highly curated multidisciplinary faculty. Learn from illustrious faculty members with extensive policymaking and implementation experience, and respected practitioners who are leaders in their field.

Join an extensive global network of more than 20,000 NCPA alumni who hold decision-making positions at all levels of government in their countries, including roles such as ministerial-level leaders, mayors and heads of organisations.

Quick Facts Box

Education Provider:	Nanyang Technological University, Singapore
Name of Programme:	Master for Public Administration – English (MPA-E), Master of Social Sciences in China and Global Governance (MCGG), Master of Science in Managerial Economics – English (MME-E)
Course Fees:	\$38,000 (for Jan 2025 intake), \$43,000 (for Aug 2025 intake)
Duration:	1 Year (Full-Time), 2 Years (Part-Time)
Students (Full and Part time)	
Intake Size:	15 – 90
GMAT Score (Mean):	N.A.
Years of Working Experience (Mean):	N.A.
Age (Mean):	N.A.

Application Information

Application Deadline:	1 July 2024 – 31 August 2024/ Nov 2025 – Jan 2026 (tentative)
Programme Date:	January 2025/ Aug 2025 Intake
Admission Requirements:	<ul style="list-style-type: none"> A bachelor's degree in good standing from an accredited university or college is required for all applicants. For applicants whose native language is not English, or whose Bachelor's degree are from universities where English is not the medium of instruction, a good IELTS/TOEFL test score is required. A minimum of two (2) years working experience and two (2) Referee Reports / Recommendation letters, for applications to the Master for Public Administration Programme

Nanyang Business School

Nanyang Technological University, Singapore
91 Nanyang Ave, Gaia, ABS-01-029, Singapore 639956
Tel: (65) 6592 8001/ 6908 3470, Email: mba.admissions@ntu.edu.sg
Website: ntu.sg/nbs-mba

Background

Young and research-intensive, Nanyang Technological University, Singapore (NTU Singapore) is ranked among the world's top universities.

Consistently ranked among the world's top business schools, Nanyang Business School (NBS) has its heritage in technology and innovation, and is dedicated to nurturing talents into impactful international business leaders. NBS is the first business school in Singapore and the third in Asia to be accredited by EQUIS and AACSB. The Nanyang MBA is an intensive yet flexible 12-month or 18-month programme designed to transform professionals into impactful leaders with the interdisciplinary skills to rethink business for a sustainable future. Highly sought-after faculty members, with extensive industry experience, lead global and research in several fields of business and finance. A holistic learning experience with a select and diverse group of talented Nanyang MBA participants sets graduates up to excel in a fast-paced, digitalised global environment in Singapore and broader Asia.

- NTU ranked 15th globally by QS University Ranking
- NTU ranked 1st in the World by Times Higher Education Young University Ranking

Programme Highlights

- Highly ranked and globally recognised
- Interdisciplinary & cutting-edge; showcasing NTU's tech & innovation
- Rich ecosystem for holistic learning & sustainability
- Double Degree options: Waseda Double MBA, St Gallen Double Masters & ESSEC Double Masters
- Specialisation: General Management, Strategy & Innovation, Banking & Finance, Business Analytics, Marketing Management, Sustainability & Innovation
- Leading People Globally module, "live" consultancy project (Strategy Projects At Nanyang) and Business Study Mission
- Merit-based scholarships and various grant/subsidy schemes are available for qualified candidates
- Programme duration:
 - Full-time: Nanyang MBA – 12 or 18 months. Waseda Double MBA – 14 months. Double Degrees – 24 months.
 - Part-time: Nanyang Professional MBA – 18 months. The unique part-time format enables working professionals to obtain a world-class MBA without compromising work and family commitments. Classes are held on alternate weekends (Saturdays and Sundays).

Quick Facts Box

Education Provider:	Nanyang Business School
Name of Programme:	Nanyang MBA / Professional MBA
Total Cost:	FT – S\$75,000*; PT – S\$80,000*
Duration:	(FT) 12 months or 18 months; (PT) 18 months
Application Information	
Application Deadline:	Round 1 - 1 November 2024 Round 2 - 15 January 2024 Round 3 - 31 March 2025
Programme Date:	End of July
Admission Requirements:	<ul style="list-style-type: none"> Bachelor's Degree At least 2 years work experience for FT & 3 years for PT GMAT score > 600 or GRE equivalent TOEFL score > 100IBT > 600 PBT or IELTS score > 6.5, if English was not the medium of instruction used at the undergraduate level

Singapore Institute of Technology

Singapore Institute of Technology
1 Punggol Coast Road Singapore 828608
Tel: +65 6592 1136, Email: Adm.Postgrad@SingaporeTech.edu.sg
Website: <https://www.singaporetech.edu.sg/admissions/postgraduate>

Background

Singapore Institute of Technology (SIT) is Singapore's University of Applied Learning, offering applied degree programmes targeted at growth sectors of the economy. With a mission to nurture individuals who positively impact society, SIT aims to be a leader in innovative learning by integrating learning, industry and community. Our postgraduate programmes enable students to develop specialist knowledge and skills relevant to the industry, providing the opportunity for graduates to become Chartered or Professional Engineers in their field.

Programme Highlights

The Master of Science in Civil Engineering programme supports upskilling and lifelong learning for continuous professional development of civil engineers. In line with SIT's unique applied learning pedagogy, this programme emphasises integration between theory and practice, with a focus on structural and geotechnical engineering applications. The programme has strong industrial relevance in its curriculum, developed in consultation with agencies and companies in the construction sector. Selected modules will be co-delivered by practising industry experts to train students to be deep specialists. In addition, it serves as a further learning component to the three-year Bachelor of Engineering in Civil Engineering, jointly offered by SIT and University of Glasgow.

Quick Facts Box

Education Provider:	Singapore Institute of Technology
Name of Programme:	Master of Science in Civil Engineering
Total Cost:	AY2024/25 subsidised Course Fees for the entire 60-credit MSc programme: \$9,150 (for Singapore Citizens) and \$18,480 (for Permanent Resident) Note: Fees are reviewed annually and subject to revision.
Duration:	2 years

Students (Full-time)

Intake Size:	N.A.
GMAT Score (Mean):	N.A.
Years of Working Experience (Mean):	At least one year of relevant post-bachelor's work experience
Age (Mean):	N.A.

Accreditation

The MSc in Civil Engineering with the three-year Bachelor of Engineering (Civil Engineering) has been granted provisional accreditation by the Engineering Accreditation Board.

Application Information

Application Deadline:	September 2024
Programme Date:	January 2025 Intake
Admission Requirements:	Relevant bachelor's degree from a recognised university and at least one year of relevant post-bachelor's work experience. For more information, please refer to https://www.singaporetech.edu.sg/postgraduate-programmes/master-science-civil-engineering

Singapore Management University

Yong Pung How School of Law

55 Armenian Street, Singapore 179943

Background

The progressive development of Asian legal systems, aided by the rise of the region's economies, has fuelled demand for expert legal and judicial services. The SMU LLM and JD programmes are carefully designed to expand your legal knowledge in classic and novel areas of the law, while simultaneously equipping you with the skill sets essential to render on-point advice on cross-border transactions, deliver high-quality adjudication and judicial administration results, or regulate the development of new technologies.

LLM Programme Highlights

- Non-law graduates with outcoming related experience are welcome
- Three multi-disciplinary tracks can be chosen with cutting-edge curriculum
- Seminar-style small classes with interactive environment

Quick Facts Box

Name of the Programme:	SMU Master of Laws
Available Tracks:	Judicial Studies, Cross-Border Business and Finance Law in Asia, Law and Technology
Total Cost:	SGD38,150 (Inclusive of GST)
Duration:	1-Year Full-Time or 2-Year Part-Time

Application Information

Application Open:	October 2024
Programme Date:	August to June Next Year
Admission Requirements:	<ul style="list-style-type: none"> Good Bachelor's degree in Law (or equivalent legal qualification) Non-law graduates who have substantial knowledge of and exposure to law may be considered for admission on a case-by-case basis. Proof of English proficiency (TOEFL/IELTS) is required for all international applicants except those from English-medium institutions in Australia, Canada, Hong Kong, Ireland, New Zealand, Philippines, United Kingdom and the United States. Minimum score: IELTS 6.5, TOEFL 90, UKVI 4.
Class Profile	

JD Programme Highlights

- Classes are taught exclusively with only JD students from diverse backgrounds
- Graduate with at least 3.0 GPA will be eligible to sit for Singapore Bar</

SUTD | OUR PG ALUMNI AND STUDENT

Dr. Matthew Yeo Soon Kiat

Alumni of SUTD PhD - Engineering Product Development (April 2024)
Currently a Research Fellow at the Singapore University of Technology and Design (SUTD)

Why did you select SUTD for your postgraduate studies, and what distinguished it from other options?

SUTD provided a unique multidisciplinary learning environment during my undergraduate studies, particularly through our design projects*. The integration of architecture and robotic engineering at SUTD allowed me to deeply engage in research on robot ergonomics. This experience offered valuable insights into developing spaces that are inclusive of robotic systems. I am very fortunate to have Associate Professor Mohan Rajesh Elara, a leader in the field of robotics, as my PhD advisor and my research topic was closely related to some of his work.

Other universities would focus on either specialisation or have limited resources for the specific industry. This would not have enabled the wider access to robots or zones for deployment and testing as I had in SUTD.

*Design experiences are incorporated within and outside the SUTD curriculum - within subjects, cutting across subjects, across academic years and projects driven by students.

What opportunities or changes did you experience after completing your PhD?

I have unique opportunities and access to both the architecture and robotics industries, allowing me to apply niche insights that other graduates may not possess. In terms of robotics engineering, I am now able to provide robotic deployment knowledge in architectural zones. With my Master of Architecture experience, I am well placed to provide architectural insights on how zones can be improved for robot productivity, such as area coverage (e.g. robotic cleaning operations), or optimised waypoint navigation for the highest visual coverage (e.g. robotic security/surveillance).

He Junbo

Student of Master of Science in Technology and Design (Sustainable Product Design)

How has the MTD programme redefined your educational experience?

I completed my bachelor's degree at California State University but pursuing the Master of Science in Technology and Design (MTD) at SUTD has truly redefined my educational experience. SUTD places a strong emphasis on practical, real-world problems, focusing on enhancing students' problem-solving abilities. The university integrates multiple disciplines seamlessly, and "design" at SUTD extends beyond traditional art or industrial design to emphasise innovative design methodology. This aspect intrigues me and inspires me to want to learn more about it.

How has your learning experience at SUTD influenced the way you solve complex problems?

As a computer science graduate, my current post-grad research spans medicine, IoT, signal processing, and algorithms, which I find incredibly fascinating. The exposure to design methods and sustainability at SUTD has broadened my perspective, especially in the full life cycle development of products. The application of design thinking in engineering has equipped me with a holistic approach to tackling complex problems, ensuring that solutions are not only technically sound but also user-centric. This unique approach has enriched my academic journey and provided me with invaluable skills not only for my future career, but also in my personal life.

Singapore University of Technology and Design

SUTD is Singapore's fourth autonomous university and one of the first universities in the world to incorporate the art and science of design and technology into a holistic interdisciplinary education and research experience. SUTD students thrive in a design-steeped environment and are encouraged to think creatively and innovatively to solve real-world problems. We leverage on the power of deep tech like artificial intelligence to bring to life human-centric solutions using design and technology.

Master of Technology in Digital Leadership

Your Pathway to Becoming an Effective Digital Leader

“What made the MDL programme unique was the right balance of business and technical content as well as the emphasis of the presentations and assignments for me to better understand and apply the learnings to create a sustained digital transformation strategy for any organisation.

Kelvin Lee

Executive Director, Social Media, UOB
(MTech Digital Leadership Alum, 2023)

Transform your leadership journey with the NUS-ISS Master of Technology in Digital Leadership programme. Designed to empower visionary leaders, this practice-oriented programme enhances your strategic acumen and equips you with future-oriented skills and the confidence to lead in the digital age. Your leadership qualities and innovation capabilities will be strengthened, enabling you to navigate complexity in the digital landscape and be a transformation catalyst within your organisation and the industry. This programme empowers leaders like you to build a digital-ready culture that brings people along the transformation journey. Our mission is to cultivate the next-gen digital leaders who inspire innovation and create real-world impact.

Our Other Graduate Programmes:

Graduate Diploma in Systems Analysis (GDipSA)
Master of Technology in Enterprise Business Analytics (MTech EBAC)
Master of Technology in Artificial Intelligence Systems (MTech AIS)
Master of Technology in Software Engineering (MTech SE)
