Interdisciplinary Legal Education In a New Era of Diversification

CITY CAMPUS

INTERNATIONAL
FACULTY MEMBERSLEADING RESEARCH
RESOURCESSEMINAR-STYLE PEDAGOGY
AND SMALL CLASS SIZE

SMU Yong Pung How School of Law is distinguished by its unique pedagogy in equipping students with fundamental knowledge and skills specific to the legal practice. The SMU Juris Doctor and Master of Laws programmes connect law with business, finance, and new technologies to produce graduates adept at collaborating across different industries. SMU's academically and professionally well-established faculty is unrivalled in their passion and commitment towards research excellence and engagement with the legal profession. On top of that, the SMU city campus located in the heart of downtown Singapore offers students not only the ease of transiting between work, home, and school, but also a bustling backdrop for social activities.

SMU Juris Doctor Programme

SMU Juris Doctor (J.D.) is a postgraduate degree for aspiring practitioners of law. This robust programme will comprehensively expose students to interdisciplinary and applied practices in the legal landscape. Through the core modules and rich electives of the JD programme, students can not only achieve knowledge of law, but also improve critical thinking, professional judgements, and presentation skills.

5 FACTS ABOUT JURIS DOCTOR

Professional Law Degree

A full-time professional law degree for graduates of any discipline.

Exclusive basis

All core law modules are taught in classes exclusively for JD students only.

Diverse Student Background

JD students hail from different disciplines and work experiences, thus promoting a rich exchange of diverse perspectives.

Qualifying Law Degree

With a GPA of ≥ 3.0 points, graduates can take the Singapore Bar exam.

Choice to value-add to your JD degree

In the course of the JD programme, students can choose to complete another SMU MBA degree, or the Dual JD Programme with Yonsei University, or the JD-LLM Programme with Bocconi University.

Master of Laws Programme

The SMU LLM programme is carefully designed to expand legal knowledge in classic and novel areas of the law, while simultaneously equipping you with the skillsets essential to render on-point advice on cross-border transactions or deliver high-quality adjudication and judicial administration results. Tracks available in the programme are:

Judicial Studies Track

- In partnership with the Singapore Judicial College
- Designed specifically for serving judges and judicial aspirants

Cross-Border Business and Finance Law in Asia Track

- Gain a double-edged legal and business advantage
- Acquire knowledge in cross-border data transaction, financial regulation, international business, investment, wealth management etc.

Law and Technology Track

- Unique interdisciplinary studies on the latest legal and regulatory issues
- Cutting-edge technologies in Data Management, AI, Blockchain, and Fintech etc

5 FACTS ABOUT MASTER OF LAWS

Advanced Law Degree

1-year full-time or 2-year part-time postgraduate programme.

Non-Law Professionals Welcome

Designed for cross-disciplinary specialisation, with about 20% of each cohort hailing from diverse non-legal fields.

Interactive Pedagogy

Experience a stimulating, multi-disciplinary exploration while cultivating analytical, collaborative, and communication skills.

Cutting-edge Curriculum

Incorporating the latest research and best business practices, the curriculum includes study tours to leading companies, organisations, and law firms.

Networking Opportunities

Connect with legal, business, and banking practitioners to gain insights into possible career pathways.

Hear About JD and LLM Alumni Stories

Drawn from various national, educational, and professional backgrounds, our JD and LLM students embody the multicultural blend of the Asia Pacific.

As a partner, I communicated with related parties to discuss not only legal issues, but also tax, accounting, finance, and other related business practices. I became aware that what clients wanted were practical legal solutions that informed their business decisions. These experiences encouraged me to learn more about Asian laws, especially when adopting common laws, which are the standard among international commercial transactions. The LLM classes were made up of motivated students from all around the world, many with substantial legal backgrounds. I was glad to be around excellent classmates and teammates, without whom I would not have completed all the tasks that we were required to work on.

*Koji Umai (Japan), Class of 2019, LLM Programme
Lawyer, One Asia Lawyers, Indonesia*

I opted to pursue the specialisation in 'Cross Border Business and Finance Law in Asia' during my LLM. Over the course of ten months, I acquired a wealth of new knowledge regarding emerging and topical legal fields such as IP Law, international transactions, financial markets, monetary policy, digital economy, fintech, and more. Having come from a Civil Law background, it was an intellectually stimulating experience to be immersed in the Common Law world and its ways of thinking about legal problems. I appreciate the new perspectives that I have acquired as a result of analysing factual matrices according to the relevant laws under both systems.

*Lai Yi-Ann (Taiwan, China), Class of 2019, LLM Programme
Partner, Chien Yeh & Associates, Taiwan*

Many businesses between Korea and Singapore require Singapore legal advice for construction, shipping, cryptocurrency, and other commercial contracts. There are only a few Koreans able to provide such advice in Korean as one needs to be qualified to practise Singapore law. SMU JD programme formed the foundation of my practice. The curriculum covered the essential theoretical aspects of each area of law encountered in my work. It was also a way for me to meet local practitioners. Group projects were also one of the highlights at SMU that required students to cooperate and bounce off ideas. I was able to make friends quickly and learned a lot from different classmates.

*Mimi Ahn (Korea), Class of 2014, JD Programme
Associate Director, Focus Law Asia, Singapore*

Be prepared to embrace diversity, as not all of your classmates will be fresh graduates and may have a different impression of university life. The diversity of the SMU JD programme brings colour to the seminar room each day. You will gain invaluable exposure to perspectives that are crucial to the application of law, many of which you may not have considered before. Your JD classmates, with their diverse backgrounds, will further enrich your learning experience. The SMU JD curriculum offers flexibility, allowing you to potentially accelerate your studies and complete Law School in just 2-2.5 years, instead of 3 years.

*Leow Jiamin (Singapore), Class of 2014, JD Programme
Partner, WongPartnership*

The SMU Juris Doctor programme was an intensive and rigorous education that surpassed all my expectations. I particularly appreciated the focus on classroom interaction, the perspectives of classmates with different backgrounds, and the quality of the experienced faculty, including leading practitioners. It provided an excellent education in the practice of law and was perfect preparation for life first as a Justices' Law Clerk and now as a lawyer in private practice.

*Chew Xiang (Singapore), Class of 2012, JD Programme
Partner, RAJAH & TANN Singapore LLP*

Master of Laws Law and Technology

Interdisciplinary Legal Education In a New Era of Diversification

Recent decades have witnessed the exponential growth of new technologies that will bring about fundamental changes to our society in the decades to come. These technological developments are not only reshaping how legal services are delivered but also calling for innovative legal and regulatory frameworks to promote their positive impacts on advancing social welfare.

The SMU LLM in Law and Technology track is the first of its kind, at least in Asia-Pacific. The new track will focus on three cutting-edge areas of technology development, data transmission, AI application, and blockchain application, as well as their interactions with law, regulation, and public policies. The fundamental objective of this new track is to get legal professionals familiar with the technologies for future legal services, and to forge a common foundation for legal professionals, tech engineers and business players to understand and communicate about a benevolent institutional framework of future technological applications.

DEVELOPING LEADERS THROUGH TOP-TIER EDUCATION PROGRAMMES!

Hear from our Students & Alumni

Jeremy John Cordeiro
Executive Master of Business Administration
University of Newcastle, Australia, Class of 2023
APAC Business Development Manager, Bentley Systems

One of the aspects that I found particularly compelling in this programme is the inclusion of modules like mindful leadership, a unique offering not commonly found in other Master's degree programmes. This unique feature demonstrates the programme's commitment to preparing students for real-world challenges.

Muhamad Ismail bin Abdol Rahim
Master of Analytics
Massey University, Class of 2021
Enterprise Sales Engineering, Snowflake

Through the programme, I am able to root my understanding in the current landscape that businesses function. It is a multi-disciplinary programme that will essentially empower recent graduates and working professionals, from non-technical and non-quantitative backgrounds, to use Analytics.

Carmen Lim
Master of Science in Cyber Security
Coventry University, Class of 2023
Security Professional, British Telecom Singapore

Coventry University offered modules that suited to my interest and fit the path I wanted to pursue. During my studies, lecturers would ask me how I was doing in my modules and my work whenever I bumped into them. After graduating, I am still in contact with some of my lecturers, such as Mr. Gregory, who was very supportive of my classmates and I till this day. I am very grateful for their efforts, which motivated me to continue pursuing what I love and have passion for. Despite being one of the 'rare' young female engineer, I feel I am right where I belong.

Entrepreneurship Academy

Technopreneurship and Innovation Programme

Master of Science | FlexiMasters

An entrepreneurship programme
deeply rooted in the technological ecosystem

The MSc TIP stood out among other MBA programmes. Instead of a top-down approach to prepare graduates to manage well-established institutions, the MSc TIP is ground-up and value creation driven. As starting my own company and brand was always at the back of my mind, the MSc TIP appealed to me.

Jason Lee, MSc TIP Class of 2010
Founder, Scent By SIX
Prestige's 40 under 40 Laureate in 2020, Singapore Prestige Brand award 2020/2021

Taking on FM TIP provided me with the skills to effectively communicate with mentors and peers from different industry backgrounds. I was thus able to gain valuable insight into founding companies and the financing required, which will be helpful for business expansion in the future.

Ng Shan Shan Kiffany, FM TIP, MSc TIP Class of 2023
Director & Marketing Director, Hong Kong Hung Kam Limited, Hung Lam Development Co.

MSc TIP is exactly what it stands for - it is not just about entrepreneurship but technopreneurship. A combination of technology with entrepreneurship attracted me.

Angelina Terlaki, MSc TIP Class of 2021
Forbes 30 Under 30 Asia 2023
Serial Entrepreneur

OUR PROGRAMMES

MASTER OF SCIENCE IN TECHNOPRENEURSHIP AND INNOVATION

Focusing on educating and nurturing leaders for the entrepreneurship ecosystem, our Master of Science in Technopreneurship and Innovation Programme (MSc TIP) empowers participants with competency to leverage on technology to create social and economic value for society.

With emphasis on experiential learning, MSc TIP integrates emerging technologies with innovative business models and practices into its curriculum. The course covers strategic and operational issues of entrepreneurial ventures at different growth stages.

Throughout the programme, participants will have opportunities to engage with many stakeholders in the entrepreneurship ecosystem. Over 2,000 alumni in more than 100 major cities and 30 countries around the world have benefitted greatly from this programme and many of them turned their entrepreneurial ideas into successful ventures.

OFFICE OF GRADUATE STUDIES AND PROFESSIONAL LEARNING

HONE YOUR SPECIALIST SKILLS

WITH POSTGRADUATE PROGRAMMES FROM SIT

Singapore Institute of Technology (SIT) is Singapore's University of Applied Learning, offering applied degree programmes targeted at growth sectors of the economy. With a mission to nurture individuals who positively impact society, SIT aims to be a leader in innovative learning by integrating learning, industry and community.

Postgraduate Offerings

SIT postgraduate programmes enable students to develop specialist knowledge and skills relevant to the industry. Whether you aim to advance in healthcare as an allied health professional or nurse, or achieve chartered status as an engineer, SIT provides the comprehensive education and hands-on experience needed to reach your career goals.

Master of Health Sciences

Master of Science in Electrical and Electronic Engineering

Master of Science in Mechanical Engineering

Master of Science in Civil Engineering

September
2025 Intake

January
2026 Intake

Features of Master Programmes

Specialised curriculum designed to meet industry demands.

Provide skills-based education and training to working professionals who wish to upgrade themselves.

Pedagogy comprises technology-enabled learning using a mix of lectures, hands-on computer-aided industrial design exercises and micro-project assignments.

Modules are offered as evening classes*. Students are expected to complete the programme on a normal candidature period of 2 years.

*Classes may run in the day for MHSc programme.

Please contact SIT Postgraduate Admissions at 6592 1136 or Adm.Postgrad@SingaporeTech.edu.sg to find out more.

Master of Health Sciences

Championing an applied learning pedagogy, SIT strives to nurture a strong core of allied health professionals and nurses who are thinking tinkerers, lifelong learners and catalysts for transformation.

The Master of Health Sciences, a 60-credit postgraduate programme offered by SIT, serves as a strong option to those who wish to deepen and broaden their skills in their specialised areas of choice, as well as immerse themselves within the local healthcare ecosystem while staying in practice.

The programme is purpose-fit and designed in close collaboration with the healthcare clusters to co-deliver flexible, high quality and industry-relevant training. Learners can continue working while undertaking this postgraduate programme.

Programme Highlights

Five specialisation tracks:

Adult and Geriatric Rehabilitation, Musculoskeletal Physiotherapy, Medical Sonography, Organ Transplant Nursing, Rehabilitation Nursing

Applied learning pedagogy which balances theory and practice, and incorporates mentoring by domain expert faculty in classroom and at training sites

Application and hands-on clinical experience at the training hospitals

There is a strong call from the healthcare industry to address gaps in practice, future-proof relevant skillsets to meet evolving healthcare needs, particularly for an ageing population, and deepen existing skillsets for an innovative care continuum through national initiatives, such as One Rehab Framework and Healthier SG. The MHSc will prepare practising allied health professionals and nurses for leadership roles in substantive specialised areas, with the goal of contributing to the science and community through evidence-based practice and develop capability to provide innovative health services responsive to changing community needs while demonstrating high standard of competency, accountability and sustainability.

The Master of Health Sciences programme with specialisations that is industry-focused, directly applicable to the needs of the Singapore healthcare system and responsive to the evolving health and social care landscape will facilitate applied learning and stage academic endeavour of our practising clinicians.

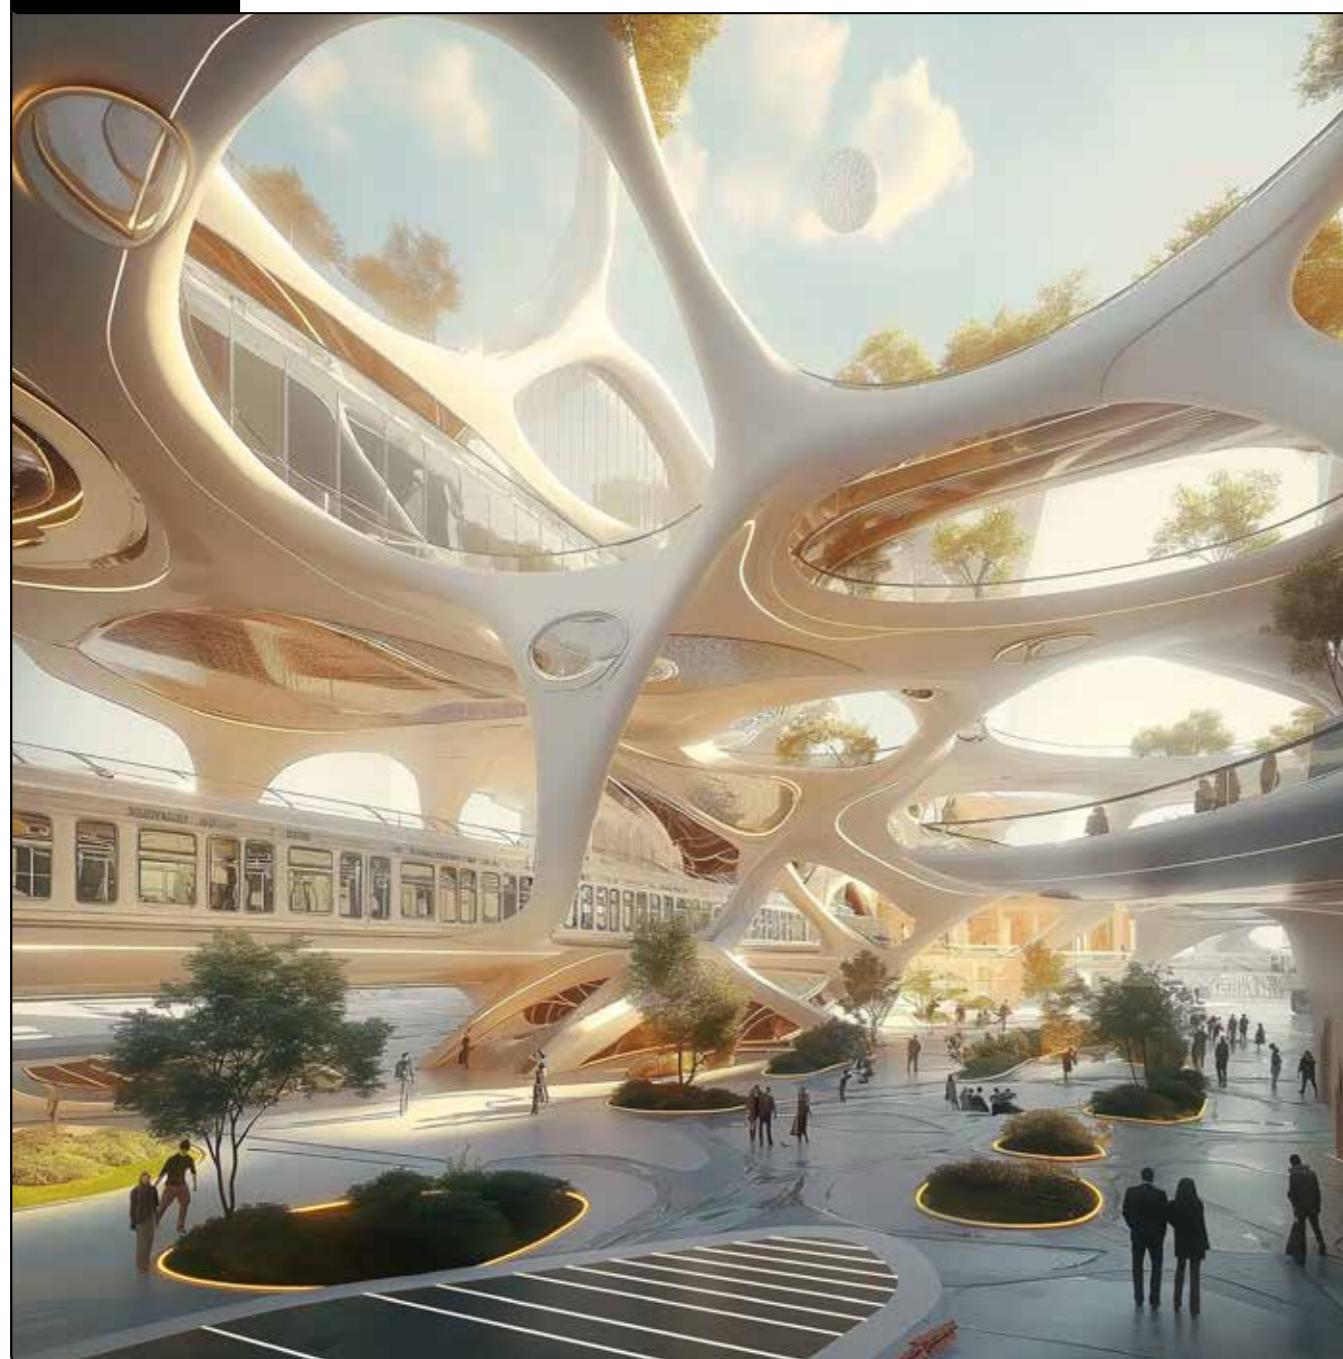

Associate Professor Muhammad Rahizan Zainuldin, Programme Leader, Master of Health Sciences, SIT.

AI DESIGNED THIS AD.

/AI.Prompt

Picture the future of a design-led tech university with expertise in AI

This ad is a demonstration of how Design, AI and Technology can come together to make a thing of beauty.

But it's not just skin-deep. This stunning cityscape design featuring a train system offers a glimpse into the not-too-distant future.

This is how SUTD leverages Design, AI and Technology to redefine higher education and research, fostering innovator leaders and empowering transformative innovations, all the while incorporating sustainability as we address real-world challenges.

“

Justin Chee Jia Wei

■ Head of Product Strategy, Smart Mobility (Roads & Services), ST Engineering
Graduated from the Master of Innovation by Design programme

I have unleashed my creativity and elevated my skills with the design tools learned from the Master of Innovation by Design programme. Through collaboration with my peers from diverse backgrounds, we have transformed innovative ideas into market-tested blueprints.

Chia Yew Ken

■ SUTD Alibaba EDB Industrial Postgraduate Programme (EDB-IPP) PhD Student

Being a student in the EDB-IPP programme at SUTD and collaborating with Alibaba DAMO Academy has offered invaluable mentorship, allowing me to delve into advanced academic research and gain practical insights into generative AI applications within the industry.

Durga Baskar

■ Master of Science in Technology and Design Programme (Cybersecurity) Student

The MTD programme has been a great experience. The professors are incredibly approachable and supportive, fostering a collaborative learning environment. I truly enjoy being part of this programme and feel well-prepared for my future career.

”

TRAILBLAZING A BETTER WORLD BY DESIGN.

Experience future-forward learning through SUTD's Masters and PhD programmes including our signature Master of Science in Technology and Design (MTD) programmes. By intertwining Design, AI and Technology, SUTD positions you to be at the forefront of tomorrow's industries, today.

James Cook University

149 Sims Drive, Singapore 387380
Tel: 6709 3888, Email: admissions-singapore@jcu.edu.au

Website: www.jcu.edu.sg

James Cook University Pte Ltd

PEI Reg. No.: 200100786K

Reg. Period: 13 July 2022 to 12 July 2026

Background

The Singapore campus of James Cook University is fully owned by James Cook University Australia. It is ranked in the top 2% of universities in the world¹ and is a leading tropical research university in Australia. The Singapore campus of James Cook University is the only Australian institution in Singapore to be awarded "University" status and was the first private education institution to be awarded the EduTrust Star.

Programme Highlights

Our Master of Guidance and Counselling course provides advanced academic and practical training in the professional discipline of counselling. It is designed to meet the developmental needs of individuals wishing to enter the counselling profession, as well as individuals seeking to develop important human and interpersonal skills in other professions.

The course has the advantage of being formally recognised as an initial counsellor training course by the Singapore Association for Counselling (SAC). The same course delivered in our Australian campus is also accredited by the Australian Counselling Association (ACA).

Quick Facts Box

Education Provider:	James Cook University
Name of Programme:	Master of Guidance and Counselling
Total Cost:	SGD 41,529 ²
Duration:	24 months

Application Information

Application Deadline: 1 month before course commencement

Programme Date: January, May, and September 2025

Admission Requirements:

- Completion of an AQF Level 7 bachelor degree in a cognate discipline. Cognate disciplines include, but are not limited to, career development, community services, education, life coaching, mental health, pastoral care, health, human services, psychology, social sciences, behavioural science, social work, law, or youth work.
- Applicants of non-English speaking backgrounds must meet the English language proficiency requirements of IELTS 6.5 (no component lower than 6.0) / TOEFL (Internet Based) 86 (no component less than 21) / Pearson PTE Academic 58 (no component less than 54)
- For Advanced Standing, in addition to meeting the entry requirements, applicants must have a minimum of five years full time relevant working experience

NTU Entrepreneurship Academy

Research Techno Plaza, 2nd Storey, BorderX Block

50 Nanyang Drive, Singapore 637553

Tel: (65) 6790 6675, Email: tipen@ntu.edu.sg

Website: www.ntu.edu.sg/ntupreneur

Background

Focusing on educating and nurturing leaders for the entrepreneurship ecosystem, our Master of Science in Technopreneurship and Innovation Programme (MSc TIP) empowers participants with competency to leverage on technology to create social and economic value for society. With emphasis on experiential learning, MSc TIP integrates emerging technologies with innovative business models and practices into its curriculum. The course covers strategic and operational issues of entrepreneurial ventures at different growth stages.

Throughout the programme, participants will have opportunities to engage with many stakeholders in the entrepreneurship ecosystem. Over 2,000 alumni in more than 100 major cities and 30 countries around the world have benefitted greatly from this programme and many of them turned their entrepreneurial ideas into successful ventures.

Highlights

Offered in two language tracks: English and Chinese

- Modelled after the venture creation cycle and with focus on experiential hands-on learning, the programme admits students with diverse educational disciplines, industry backgrounds, and nationalities.
- Opportunities to engage with academics, entrepreneurs, and industry practitioners including IP lawyers and venture capitalists etc.
- Know-how to commercialise a business idea or technology from the research outputs of engineers and investors.
- Networking sessions within the entrepreneurship ecosystem for first-hand insights to succeed in the business world.
- Choice of Flexible learning via FlexiMasters

National Institute of Education

1 Nanyang Walk, Singapore 637616
Email: niegpl@nie.edu.sg
Website: <https://ntu.sg/nie-gradprog>

Background

Through the years, National Institute of Education, Nanyang Technological University, Singapore (NIE NTU, Singapore), has played a pivotal role in shaping the teaching profession in Singapore. Although NIE NTU, Singapore, is well-known for its initial teacher education programmes, NIE has a strong reputation for evidence-informed graduate education, executive leadership and professional development programmes and courses. These are delivered through the Office of Graduate Studies and Professional Learning with the support of the Academic Departments that represent a range of disciplines. Many of our faculty members are internationally renowned in their respective academic fields. Our aim is for our students to become thought leaders, disciplinary experts and skilful researchers who can bring critical change in their respective professional contexts and academic fields. This aspiration is embodied in our philosophical statement of "Learning Differently, Leading Change".

Programme Highlights

- The Doctor in Education (EdD) programme has the rigour and expectations of a PhD.
- The programme is designed for professionals in education and education-related fields.
- It also prepares candidates for leadership in managerial and administrative positions who can use and extend existing knowledge to solve educational challenges.

Quick Facts Box

Education Provider:	National Institute of Education
Name of Programme:	Doctor in Education (EdD)
Total Cost:	\$64,740 (Singapore Citizens) \$82,485 (Singapore PRs) \$82,836 (International Students) Our tuition fees are subject to yearly revision as announced by NTU & prevailing GST.
Duration:	Up to a maximum of 5 years

Application Information

Application Deadline:	5 May - 19 June 2025
Programme Date:	January 2026
Admission Requirements:	<ul style="list-style-type: none"> A Bachelor's and Master's degree with good grades from an approved university which we judge to be of satisfactory standing. At least four years' relevant experience in education or education-related fields. TOEFL's minimum score of 600 (for paper and pencil examination) or 100 for internet-based, or IELTS's minimum score of 7.0 is required for international students and graduates of universities with non-English medium of instruction.

Management Development Institute of Singapore (MDIS)

501 Stirling Rd, Singapore 148951
Contact Details: 6278 8000
Website: www.mdis.edu.sg
PEI Reg. No. : 201001793H | Reg. Period: 18/09/2024 – 17/09/2028

Background

Founded in 1956, the Management Development Institute of Singapore (MDIS) is one of Singapore's oldest not-for-profit professional institutes for lifelong learning. MDIS has two main subsidiaries: Management Development Institute of Singapore Pte Ltd which oversees its Singapore academic operations, and MDIS International Pte Ltd which focuses on MDIS' globalisation strategy.

MDIS offers internationally-accredited courses in Business and Management, Engineering, Fashion and Design, Health and Nursing, Health Sciences, Information Technology, Languages and Education, Life Sciences, Media and Communications, Psychology, Tourism and Hospitality Management, and Safety and Environmental Management. These programmes are offered in collaboration with renowned universities in the United Kingdom and the United States of America.

Programme Highlights

Master of Business Administration, Awarded by: University of Sunderland, UK

The MBA programme at MDIS equips you with the ability and knowledge to attain your goals. It will provide a comprehensive understanding of business and management principles, allowing you to make strategic decisions and effectively lead teams and organisations. Additionally, the MBA programme will allow you to network with industry professionals, collaborate with like-minded peers, and gain real-world experience through internships and project-based learning.

Pursuing an MBA in MDIS also offers a unique opportunity to immerse yourself in a vibrant and dynamic business culture, with access to a wide range of international companies and global connections. Whether you are looking to advance your career, transition into a new field, or start your own business, the MBA programme can be a valuable investment in your future. Take advantage of the opportunity to advance and become a leader in the business world!

Quick Facts Box

Education Provider:	University of Sunderland, UK
Name of Programme:	Master of Business Administration
Duration:	Full-time: 12 Months / Part-time: 12 Months
Course Fees (inclusive of 9% GST):	Local (Full-time) – a) Tuition Fees- \$S23,980.00, b) Non-Tuition Fees - \$S700.00 - \$S1,700.00 & c) Application Fees: \$S163.50 International (Full-time) – a) Tuition Fees- \$S28,122.00, b) Non-Tuition Fees - \$S1,290.00 - \$S2,800.00 & c) Application Fees: \$S490.50

Other Available Programmes

- Master of Science Healthcare Management, Awarded by: Edinburgh Napier University, UK
- Master of Business Administration, Awarded by: University of Sunderland, UK
- Master of Science Tourism and Hospitality, Awarded by: University of Sunderland, UK
- Master of Arts Education, Awarded by: University of Sunderland, UK
- Master of Science Project Management, Awarded by: University of Sunderland, UK
- Master of Science Health and Safety, Awarded by: Leeds Beckett University, UK
- Master of Science Cybersecurity, Awarded by: Teesside University, UK
- Master of Public Health, Awarded by: Teesside University, UK
- Doctorate in Business Administration, Awarded by: Teesside University, UK

Application Information

Application Deadline:	3 Jan 2025 and 2 May 2025
Programme Date:	3 Feb 2025 and 2 Jun 2025
Admission Requirements:	1) A relevant degree. All levels of practical work/work experience will be considered including applications from candidates with pre-graduation or limited/no work experience. 2) An equivalent professional qualification. All levels of practical work/work experience will be considered including applications from candidates with pre-graduation or limited/no work experience. 3) Applications from those in senior roles without a formal academic background will be considered by academic judgment. Applications should be made with a portfolio of evidence demonstrating capability and managerial experience. 4) MDIS Graduate Diploma in Human Resource Management

Singapore Institute of Technology

Singapore Institute of Technology
1 Punggol Coast Road Singapore 828608
Tel: +65 6592 1136, Email: Adm.Postgrad@SingaporeTech.edu.sg
Website: www.singaporetech.edu.sg/admissions/postgraduate

Background

Singapore Institute of Technology (SIT) is Singapore's University of Applied Learning, offering applied degree programmes targeted at growth sectors of the economy. With a mission to nurture individuals who positively impact society, SIT aims to be a leader in innovative learning by integrating learning, industry and community. Our postgraduate programmes enable students to develop specialist knowledge and skills relevant to the industry, providing the opportunity for graduates to become Chartered or Professional Engineers in their field.

Programme Highlights

The Master of Science in Electrical and Electronic Engineering programme is formulated to equip graduates and professionals with broad and robust training on modern electrical and electronic engineering technologies, with a strong focus on smart applications in an urban environment. It is suitable for recent graduates who wish to develop the specialist knowledge and skills relevant to this industry. It is also suitable for mid-career professionals who wish to take advantage of current economic restructuring and industrial transformation to switch to electrical and electronic engineering careers in sectors including but not limited to: power and energy, transportation and connectivity, built environment and advanced manufacturing.

Quick Facts Box

Education Provider:	Singapore Institute of Technology
Name of Programme:	Master of Science in Electrical and Electronic Engineering
Total Cost:	AY2024/25 subsidised Course Fees for the entire 60-credit MSc programme: \$9,150 (for Singapore Citizens) and \$18,480 (for Permanent Resident) Note: Fees are reviewed annually and subject to revision.
Duration:	2 years

Students (Full-time)

Intake Size:	N.A.
GMAT Score (Mean):	N.A.
Years of Working Experience (Mean):	At least one year of relevant post-bachelor's work experience
Age (Mean):	N.A.

Accreditation

The MSc in Electrical and Electronic Engineering is fully accredited under the Washington Accord by the Engineering Accreditation Board. The accreditation status applies to graduates who have completed both the MSc Electrical and Electronic Engineering and the BEng (Hons) Electrical Power Engineering.

Application Information

Application Deadline:	May 2025
Programme Date:	September 2025 Intake
Admission Requirements:	Relevant bachelor's degree from a recognised university and at least one year of relevant post-bachelor's work experience. For more information, please refer to https://www.singaporetech.edu.sg/postgraduate-programmes/master-science-electrical-and-electronic-engineering

Duke-NUS Medical School

8 College Rd, Singapore 169857
Email: admissions@duke-nus.edu.sg
Website: <https://duke-nus.edu.sg>

Background

Duke-NUS is Singapore's flagship graduate entry medical school, established in 2005 with a strategic, government-led partnership between two world-class institutions: Duke University School of Medicine and the National University of Singapore (NUS). Through an innovative curriculum, students at Duke-NUS are nurtured to become multi-faceted 'Clinicians Plus' poised to steer the healthcare and biomedical ecosystem in Singapore and beyond. A leader in ground-breaking research and translational innovation, Duke-NUS has gained international renown through its five signature research programmes and 10 centres. The enduring impact of its discoveries is amplified by its successful Academic Medicine partnership with Singapore Health Services (SingHealth), Singapore's largest healthcare group. This strategic alliance has spawned 15 Academic Clinical Programmes, which harness multi-disciplinary research and education to transform medicine and improve lives.

MD Programme Highlights

The Duke-NUS Doctor of Medicine (MD) programme embraces a pioneering "Clinicians First, Clinicians Plus" educational philosophy, guiding graduates to first become competent and patient-centered clinicians before advancing their other capabilities to become clinician-scientists, innovators, educators and leaders.

PhD Programme

The school's PhD programmes embed students in its five Signature Research Programmes, learning from scientists who are tackling the most pressing healthcare challenges in Singapore and Southeast Asia through basic and translational research.

Quick Facts Box

Name of Programme:	• PhD in Integrated Biology and Medicine (IBM) • PhD in Quantitative Biology and Medicine (QBM)
Total Cost:	A scholarship covering 100% of tuition and miscellaneous fees payable for the 4-year duration; and a monthly stipend (IBM & QBM)
Duration:	4-5 Years

Application Information

Application Deadline:	15 January
Programme Date:	August
Admission Requirements:	3 – 5 references, typically from professors, mentors and/or employers (I) PhD in Integrated Biology and Medicine • All applicants must have completed, or be in the final year of, a bachelor or honours degree • 3 – 5 references, typically from professors, mentors and/or employers (II) PhD in Quantitative Biology and Medicine • Biostatistics and Health Data Science: a master's degree or a bachelor's degree in a quantitative discipline (Statistics/Biostatistics/Math/Computer Science/Epidemiology). • Computational Biology: a bachelor's degree in biological, computational, or quantitative discipline. • GRE is optional for PhD (QBM) application
Students Profile	
Intake Size:	78
Age (Mean):	21 - 40 years old

MITM Programme

The Duke-NUS Master of International Translational Medicine (MITM) programme, launched in 2022, offers students a unique opportunity to learn from those directly involved in translational medicine; engaging with world leading experts through our partnership with the Eureka Institute for Translational Medicine.

Quick Facts Box

Name of Programme:	Master of International Translational Medicine (MITM)
Total Cost:	SGD 54,000 + GST
Duration:	2 Years (Part-Time)

Application Information

Application Open:	First half of 2025
Programme Date:	August 2025
Admission Requirements:	• Bachelor's degree, and working in the translational medicine field or in healthcare

Students Profile

Intake Size: 2022: 11, 2023: 6

Singapore University of Social Sciences (SUSS)

463 Clementi Road, Singapore 599494
Tel: (65) 6248 9777, Email: GS_Recruitment@suss.edu.sg
Website: www.suss.edu.sg

Background

As the only local university in Singapore dedicated to adult learners, SUSS has a unique place in the tertiary education landscape in Singapore. SUSS plays an important role in supporting Singapore's economic growth by providing skills and knowledge upgrading pathways for working adults.

Our modular programmes are based on current industry and professional trends and needs, to enable our students to complement and enhance their personal and working lives. SUSS adopts a flexible and practice-focused teaching and learning approach, and offers programmes that are rigorous, multi-mode and relevant – factors that are highly valued by busy executives who demand learning that can be tailored to suit their busy schedules, and knowledge and skills that are immediately applicable to their jobs.

Programme Highlights

The Master of Digital Marketing (MDMK) programme provides a formal and structured learning in Digital Marketing. The programmes provide a wide range of digital marketing courses to equip our students with up-to-date digital marketing theories and ready-to-apply digital marketing practices.

The Master of Digital Marketing programme aims to nurture highly specialised digital marketing professionals. It offers a choice of three tracks to accommodate different learning needs. The Generic Digital Marketing track offers the students a broad spectrum of courses covering various digital marketing topics. The Analytics track is designed to give the students a deep dive into quantitative skills needed for effective marketing campaign. The Design track imparts students with critical skills to build information and digital products, services, events and processes that are useful, useable, and desirable.

<tbl_r cells="2" ix="4" maxcspan="1" maxrspan="1

SUTD | OUR PG ALUMNI AND STUDENT

Dr. Matthew Yeo Soon Kiat

Alumni of SUTD PhD - Engineering Product Development (April 2024)
Currently a Research Fellow at the Singapore University of Technology and Design (SUTD)

Why did you select SUTD for your postgraduate studies, and what distinguished it from other options?

SUTD provided a unique multidisciplinary learning environment during my undergraduate studies, particularly through our design projects*. The integration of architecture and robotic engineering at SUTD allowed me to deeply engage in research on robot ergonomics. This experience offered valuable insights into developing spaces that are inclusive of robotic systems. I am very fortunate to have Associate Professor Mohan Rajesh Elara, a leader in the field of robotics, as my PhD advisor and my research topic was closely related to some of his work.

Other universities would focus on either specialisation or have limited resources for the specific industry. This would not have enabled the wider access to robots or zones for deployment and testing as I had in SUTD.

*Design experiences are incorporated within and outside the SUTD curriculum - within subjects, cutting across subjects, across academic years and projects driven by students.

What opportunities or changes did you experience after completing your PhD?

I have unique opportunities and access to both the architecture and robotics industries, allowing me to apply niche insights that other graduates may not possess. In terms of robotics engineering, I am now able to provide robotic deployment knowledge in architectural zones. With my Master of Architecture experience, I am well placed to provide architectural insights on how zones can be improved for robot productivity, such as area coverage (e.g. robotic cleaning operations), or optimised waypoint navigation for the highest visual coverage (e.g. robotic security/surveillance).

He Junbo

Student of Master of Science in Technology and Design (Sustainable Product Design)

How has the MTD programme redefined your educational experience?

I completed my bachelor's degree at California State University but pursuing the Master of Science in Technology and Design (MTD) at SUTD has truly redefined my educational experience. SUTD places a strong emphasis on practical, real-world problems, focusing on enhancing students' problem-solving abilities. The university integrates multiple disciplines seamlessly, and "design" at SUTD extends beyond traditional art or industrial design to emphasise innovative design methodology. This aspect intrigues me and inspires me to want to learn more about it.

How has your learning experience at SUTD influenced the way you solve complex problems?

As a computer science graduate, my current post-grad research spans medicine, IoT, signal processing, and algorithms, which I find incredibly fascinating. The exposure to design methods and sustainability at SUTD has broadened my perspective, especially in the full life cycle development of products. The application of design thinking in engineering has equipped me with a holistic approach to tackling complex problems, ensuring that solutions are not only technically sound but also user-centric. This unique approach has enriched my academic journey and provided me with invaluable skills not only for my future career, but also in my personal life.

Singapore University of Technology and Design

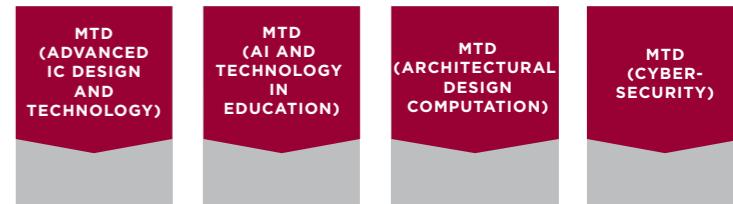

SUTD is Singapore's fourth autonomous university and one of the first universities in the world to incorporate the art and science of design and technology into a holistic interdisciplinary education and research experience. SUTD students thrive in a design-steeped environment and are encouraged to think creatively and innovatively to solve real-world problems. We leverage on the power of deep tech like artificial intelligence to bring to life human-centric solutions using design and technology.

New Programmes, Endless Possibilities

Discover these exciting graduate programmes from the **SUSS School of Business!** Designed for the future, these programmes equip you with cutting-edge expertise to elevate your career.

Master of Financial Technology 中文金融科技学硕士 [in Chinese]

Our Master of Financial Technology programme equips you to navigate financial complexities and lead in a fast-evolving economy. It provides a strong foundation in fintech theory, applications, and practices, covering key topics such as blockchain, data science, AI, quantum computing, and ethical governance. Combining theory with applied practice, the programme helps you quickly master cutting-edge fintech concepts and technologies efficiently.

Master of Science in Management 中文管理学硕士 [in Chinese]

Master global management skills and elevate your career with our Master of Science in Management programme. Build a strong foundation in management theories while enhancing leadership skills and understanding modern business practices. Explore advanced technologies, innovative business models, and economic opportunities in Singapore and ASEAN. Combining theory with hands-on practice, the programme equips you with the latest management knowledge and techniques in an accelerated timeframe.

Master of Sustainability Management

Shape a sustainable future with our Master of Sustainability Management programme. Designed for aspiring leaders in sustainability, this programme equips you with the knowledge and skills to drive positive change across industries. Core courses provide a comprehensive foundation in global sustainability trends and practical tools to advance your organisation's green initiatives. Elective courses offer the flexibility to specialise in areas that align with your career aspirations, enabling you to make a meaningful impact in the world of sustainability.
