NTU Academy for Professional
and Continuing Education

NTU INTERDISCIPLINARY GRADUATE PROGRAMME

MASTER OF SCIENCE IN ENTERPRISE ARTIFICIAL INTELLIGENCE
MASTER OF SCIENCE IN ENGINEERING MANAGEMENT
MASTER OF SCIENCE IN NANOTECHNOLOGY AND NANOSCIENCE

The NTU Interdisciplinary Graduate Programme is designed to provide you with a broad-based education that spans multiple academic disciplines. By leveraging the expertise of NTU's distinguished faculty, the programme equips you with in-demand skills that are essential for navigating the ever-changing global economy. You will engage with complex, multi-disciplinary issues and develop the breadth of understanding needed to navigate change and lead innovative solutions across sectors.

INTEGRATION OF KNOWLEDGE

Attain skills and knowledge across multiple disciplines, fostering a holistic understanding of complex problems while cultivating essential leadership abilities.

PROBLEM-BASED LEARNING

Adapt in real-world case studies and projects, enhancing problem-solving skills and practical experience.

COLLABORATIVE LEARNING

Collaborate in diverse teams, developing innovative solutions and building a robust professional network while fostering a sense of community.

CAREER OPPORTUNITIES

Advance in professional development and career prospects across various fields, achieving your aspirations and making a meaningful impact.

“

The programme aligns with my passion for advanced materials, semiconductor technology and applied research. It offers not only in-depth theoretical learning but also hands-on practice and project training.

Chen Yanning
MSc in Nanotechnology and Nanoscience
Class of 2026

“

Through case studies and hands on learning, students gain the skills and agility to lead AI initiatives that are not just technically sound, but commercially viable and ethically responsible.

Dr Zhang Jiehuang
Lecturer
College of Computing and Data Science
Co-programme Director
MSc in Enterprise Artificial Intelligence

“

I can now walk into any product conversation and connect technology, business strategy, and human needs in one coherent narrative. That confidence didn't exist before this programme.

Chinthala Pravalika
MSc in Engineering Management
Class of 2026

LEARNING NEVER STOPS

ABOUT NTU PACE

In collaboration with NTU's colleges, schools, institutes, centres, industry partners, and SkillsFuture Singapore (SSG), NTU PACE is committed to providing lifelong learning opportunities for all. We offer insightful and relevant courses tailored to meet the needs of organisations aiming to equip their workforce with prevalent skills to remain competitive in the ever-changing global landscape. Our expansive range of programmes cater to multiple skill levels from varied industries.

OUR PROGRAMMES

SSG Funding available for selected courses

- SkillsFuture Career Transition Programme (SCTP)
- FlexiMasters (Micro-credentials)
- Graduate Certificates (Micro-credentials)
- Professional Certificates (Short courses)
- Executive Certificates (Short courses)
- Professional Development Courses (Short courses)

NTU ALUMNI COURSE CREDITS

NTU Alumni receive S\$1,600 course credits

NTU alumni receive S\$1,600 in course credits to co-pay up to 50% of payable course fees (before 9% GST) at NTU's CET Units.

“

What surprised me most was the depth of the programme—I stepped into a domain with no prior hands-on experience, yet gained far more than expected. It also reshaped how I view data, giving me new perspectives on how it can be managed and analysed. I have since begun applying these insights to my work and existing systems, enabling me to engage in data-driven discussions, ask sharper questions, and connect insights to strategy. As a result, I am able to contribute more effectively in the workplace.

Fred Chan Kin Peow
Lead QS
Ufinity Pte. Ltd.
Completed (SCTP) Advanced Professional Certificate in Data Science and AI

“

My FlexiMasters in TIP journey has been accelerating, helping to shape my growth from a typical start-up trajectory towards where I aspire to be. A key takeaway was the founders-first strategy framework, the programme turned my trial-and-error approach into a clear roadmap for scaling and growth. The programme was highly practical, with immediate applications to my work. My advice to future learners is to fully embrace the cohort and learn from one another's diverse perspectives.

Tan Jiayu

Application Period:
1 June – 31 January
(following year)

LOCATION
Singapore

WHY DUKE-NUS MD PROGRAMME?

US-STYLE GRADUATE MEDICAL TRAINING

Duke-NUS Medical School follows a postgraduate model inspired by Duke University School of Medicine, focusing on critical thinking and clinical reasoning.

STRONG RESEARCH FOCUS

A dedicated research year builds skills in scientific inquiry and prepares students for academic and innovation-driven careers.

STRONG INTERNATIONAL PARTNERSHIP AND EXPOSURE

In collaboration with Duke University, students access exchanges and research opportunities, with global exposure beyond Singapore.

INTEGRATION WITH SINGAPORE'S LARGEST HEALTHCARE SYSTEM

Clinical training within SingHealth provides early patient exposure and strong residency pathways in Singapore.

ABOUT OUR
PHD PROGRAMME

The Singapore Institute of Technology (SIT) is Singapore's first University of Applied Learning. Guided by our mission to nurture individuals who make a meaningful impact on society, SIT aims to lead in innovative learning by bridging education, industry, and community.

Master of Health Sciences (via CSM Pathway)

Specialisation Tracks:

- Adult and Geriatric Rehabilitation
- Musculoskeletal Physiotherapy
- Medical Sonography
- Organ Transplant Nursing
- Rehabilitation Nursing

Master of Science in Civil Engineering

Programme Highlights:

- Structural & Geotechnical Engineering focus
- Modern steel and concrete materials
- Advanced Geotechnical topics
- Hands-on Numerical Modelling

OTHER PROGRAMMES

Customise your learning journey in alignment with your goals and be empowered to earn recognition at a pace that best suits you. We offer Specialist Certificate and Executive Education programmes designed to meet the future demands of work:

1. Ethical Computing and Data Analysis
2. Machine Learning
3. Advanced Generative Text Artificial Intelligence
4. Machine Learning and AI Data Analytics for the Semiconductor Industry (Executive Education)

THE SCHOOL FOR
INNOVATORS

THE HUMAN ADVANTAGE ISN'T WHAT YOU KNOW.

AT THE WORLD'S FIRST Design·AI UNIVERSITY

AI alone is just deep tech. **Design·AI** at SUTD goes further—integrating AI with creativity, empathy, ethics and critical thinking to develop solutions that serve people, not just technology.

Through **Design·AI** Innovation and Venture Exploration (DIVE), SUTD postgraduates experience innovation beyond traditional research or coursework. Working on real-world challenges with industry and users, you'll create human-centred innovations designed for meaningful impact.

Because the future belongs not to AI alone, but to those who will design it not just with intelligence, but with intention.

Apply now

sutd.edu.sg/admissions/graduate

IT'S WHAT YOU CHOOSE TO BUILD.

This ad is a demonstration of how **Design, AI and Technology** can come together to make a thing of beauty.

But it's not just skin-deep. This stunning cityscape design featuring a train system offers a glimpse into the not-too-distant future.

This is how SUTD leverages **Design, AI and Technology** to redefine higher education and research, fostering innovator leaders and empowering transformative innovations, all the while incorporating sustainability as we address real-world challenges.

“

Daniel Leong

■ PhD Student

At first, I was unsure about doing my PhD. More than 20 years have passed since I completed my M.Eng, and going back to school felt full of challenges. After discussing it with, and receiving good input from, Prof. Ricky Ang, I took the plunge and have not regretted it since.

Through the hands-on and open learning culture at SUTD, I found it easy to understand new concepts and pick up where I left off academically. It was seamless to use Design and Artificial Intelligence in my research, and its importance in my professional work was beyond doubt. It allowed me to explore new research areas that were previously not accessible or took excessive time. Through the programme, I learnt to manage AI's constraints and shortcomings.

Taking up my PhD at SUTD has been rewarding professionally and deeply satisfying personally. It has boosted my capabilities and confidence to face a rapidly changing workplace. If there are any regrets at all, it was not doing it earlier.

Syed Adeel Ahmed

■ Master of Science in Design and Artificial Intelligence for Enterprise Student

The MDAI-E programme has been one of the most transformative learning experiences in my academic and professional journey. What sets MDAI-E apart is its unique combination of Advanced AI and Design for education, with strong Enterprise integration.

Unlike many programmes that focus primarily on theory, MDAI-E emphasizes the practical application of intelligent technologies through real-world projects, interdisciplinary collaboration, and meaningful industry engagement. The curriculum has enabled me to deepen my expertise in areas such as machine learning, intelligent systems, optimization, and trustworthy AI, while developing the ability to solve complex real-world challenges.

A particularly valuable aspect of the programme is the extended industry internship opportunity, which allows students to gain hands-on experience applying AI solutions in a professional environment within Singapore. This practical exposure bridges the gap between academic learning and industry expectations, enabling graduates to build both technical competence and relevant work experience before entering the workforce. The programme has strengthened my research capabilities, expanded my professional network, and equipped me with the skills and confidence to contribute to the rapidly evolving AI landscape.

GunHyun Jeong

■ Master of Science in Design and Artificial Intelligence for Enterprise Student

When I joined the Master of Science in Technology and Design (Data Science) programme at SUTD, I transitioned from a background in architecture into an entirely new field. One year has gone by so quickly, and I have achieved more than I ever imagined possible, including winning first place in two Master's programme-wide innovation project competitions and securing second place in the Singtel Track of the 2026 National AI Student Challenge (NAISC).

What made the journey especially meaningful was the opportunity to apply classroom learning to real-world projects, collaborate with talented teammates, and present our ideas to industry professionals. SUTD challenged me to step outside my comfort zone and

”

TRAILBLAZING A BETTER WORLD BY DESIGN.

Experience future-forward learning through SUTD's Masters and PhD programmes including our signature Master of Science in Technology and Design (MTD) programmes. By intertwining Design, AI and Technology, SUTD positions you to be at the forefront of tomorrow's industries, today.

Entrepreneurship Academy

Technopreneurship and Innovation Programme

Master of Science | FlexiMasters

An entrepreneurship programme deeply rooted in the technological ecosystem

"The MSc TIP stood out among other MBA courses. Instead of a top-down approach to prepare graduates to manage well-established institutions, the MSc TIP is ground-up and value creation driven. Starting my own brand was always at the back of my mind and naturally, MSc TIP appealed to me."

Jason Lee, MSc TIP Class of 2010
Founder, Scent By SIX
Prestige's 40 under 40 Laureate in 2020, Singapore Prestige Brand award 2020/2021

"Taking on FM TIP helped me develop the skills to communicate effectively with mentors and peers from diverse industry backgrounds and I was able to thus gain valuable insight into founding companies and the financing required, which will be helpful for business expansion in the future."

Ng Shan Shan Kiffany, FM TIP, MSc TIP Class of 2023
Director & Marketing Director, Hong Kong Hung Kam Limited, Hung Lam Development Co.

"MSc TIP is a great starting point to explore the broader Technology, Innovation, and Entrepreneurship ecosystem. It offers valuable access to a strong alumni network, many of whom have gone on to build respected names in the industry. Over the years, I've been pleasantly surprised by the number of prominent business leaders, venture capitalists, corporate venture capitalists, and innovation professionals who are graduates of the MSc TIP."

Farhan Firdaus, MSc TIP Class of 2020
Partner & CEO (Learning & Development), Meet Ventures

NTU Innovation and Entrepreneurship

OUR PROGRAMME

MASTER OF SCIENCE IN TECHNOPRENEURSHIP AND INNOVATION

Focusing on educating and nurturing leaders for the entrepreneurship ecosystem, our Master of Science in Technopreneurship and Innovation Programme (MSc TIP) empowers participants with competencies to leverage on technology to create social and economic value for society.

With emphasis on experiential learning, MSc TIP integrates emerging technologies with innovative business models and practices into its curriculum. The programme covers strategic and operational issues of entrepreneurial ventures at different growth stages.

Throughout the programme, participants will have the opportunity to engage with diverse stakeholders in the entrepreneurship ecosystem. Over 2,000 alumni from more than 100 major cities and 30 countries around the world have benefitted greatly from this programme, and many of them have turned their entrepreneurial ideas into successful ventures.

Learn to deal with uncertainties and adapt to changes

Manage risk and operate business

Seize opportunities from new or disruptive technologies

Test your business ideas

Learn what investors look for in a start-up

Increase your business survival and success

Cultivate value, integrity and leadership

Syllabus designed for all aspiring or budding entrepreneurs. Students will be challenged academically through advanced assessments

FLEXIMASTERS IN TECHNOPRENEURSHIP AND INNOVATION

The FlexiMasters in Technopreneurship and Innovation Programme (FM TIP) is designed with support from the Singapore government for working professionals who are looking to learn more about entrepreneurship and the essential skillsets to turn novel ideas into successful ventures.

Academic Units earned are stackable and transferable to MSc TIP**

Weekend and weekday night classes

Supported by SkillsFuture as part of Singapore's national effort to develop future-ready talents, eligible FlexiMasters students will enjoy study grants#

Programme caters to diverse students through hybrid mode for synchronous learning

Singaporeans and Singapore Permanent Residents only
**Credits earned are transferable to MSc TIP, subject to the admission and academic requirements for the credit transfer

BUILDING TOMORROW'S LEADERS WITH TRANSFORMATIVE EDUCATION PROGRAMMES

Hear from our Students & Alumni!

Joie Lim Jing Yi,
Executive MBA
The University of Newcastle,
Australia
Class of 2025
Head - Partner Business
Development
Insurance Sector

The programme has broadened my perspective, strengthened my ability to navigate complex challenges, and empowered me to craft innovative strategies that drive organisational success. The networking opportunities with fellow professionals and industry experts have been particularly enriching, allowing me to share insights, learn from others' experiences, and build meaningful connections.

Michael Tjeng,
Master of Science in Data Science
University of Hertfordshire
Class of 2023
Senior Executive
Education Industry

I chose the MSc in Data Science due to its affordable fees compared with similar programmes and because it offered a good blend of theory and practical experience. I gained valuable skills through this programme in programming, data analysis, and machine learning. These skills have been directly applicable to my current role, where I am working on a data mining and predictive analytics project.

Ravee Vellu S,
Master of Business Administration (Part Time)
University of Hertfordshire
Class of 2025
Director
Travel and Tourism Industry

This MBA programme has made a meaningful difference to my professional goals. It has given me greater credibility when conducting talks and lectures as part of my work, and securing government support and grants for my training programmes has become much easier. The programme is well structured, relevant to today's trends, and it truly broadens your perspective when it comes to career paths and business management.

Carmen Lim,
Master of Science in Cyber Security
Coventry University
Class of 2023
Presales Technical Consultant,
Cyber Security Governance,
Starhub

Coventry University offered modules that suited to my interest and fit the path I wanted to pursue. During my studies, lecturers would ask me how I was doing in my modules and my work whenever I bumped into them. After graduating, I am still in contact with some of my lecturers, such as Mr. Gregory, who was very supportive of my classmates and I till this day. I am very grateful for their efforts, which motivated me to continue pursuing what I love and have passion for. Despite being one of the 'rare' young female engineers, I feel I am right where I belong.

Interdisciplinary Legal Education In a New Era of Diversification

CITY CAMPUS

INTERNATIONAL
FACULTY MEMBERSLEADING RESEARCH
RESOURCESSEMINAR-STYLE PEDAGOGY
AND SMALL CLASS SIZE

SMU Yong Pung How School of Law is distinguished by its unique pedagogy in equipping students with fundamental knowledge and skills specific to the legal practice. The SMU Juris Doctor and Master of Laws programmes connect law with business, finance, and new technologies to produce graduates adept at collaborating across different industries. SMU's academically and professionally well-established faculty is unrivalled in their passion and commitment towards research excellence and engagement with the legal profession. On top of that, the SMU city campus located in the heart of downtown Singapore offers students not only the ease of transiting between work, home, and school, but also a bustling backdrop for social activities.

SMU Juris Doctor Programme

SMU Juris Doctor (J.D.) is a postgraduate degree for aspiring practitioners of law. This robust programme will comprehensively expose students to interdisciplinary and applied practices in the legal landscape. Through the core modules and rich electives of the JD programme, students can not only achieve knowledge of law, but also improve critical thinking, professional judgements, and presentation skills.

5 FACTS ABOUT JURIS DOCTOR

1

Professional Law Degree

A full-time professional law degree for graduates of any discipline.

2

Exclusive basis

All core law modules are taught in classes exclusively for JD students only.

3

Diverse Student Background

JD students hail from different disciplines and work experiences, thus promoting a rich exchange of diverse perspectives.

4

Qualifying Law Degree

With a GPA of ≥ 3.0 points, graduates can take the Singapore Bar exam.

5

Choice to value-add to your JD degree

In the course of the JD programme, students can choose to complete another SMU MBA degree, or the Dual JD Programme with Yonsei University, or the JD-LLM Programme with Bocconi University.

Master of Laws Programme

The SMU LLM programme is carefully designed to expand legal knowledge in classic and novel areas of the law, while simultaneously equipping you with the skillsets essential to render on-point advice on cross-border transactions or deliver high-quality adjudication and judicial administration results. Tracks available in the programme are:

Judicial Studies Track

- In partnership with the Singapore Judicial College
- Designed specifically for serving judges and judicial aspirants

Cross-Border Business and Finance Law in Asia Track

- Gain a double-edged legal and business advantage
- Acquire knowledge in cross-border data transaction, financial regulation, international business, investment, wealth management etc.

Law and Technology Track

- Unique interdisciplinary studies on the latest legal and regulatory issues
- Cutting-edge technologies in Data Management, AI, Blockchain, and Fintech etc

5 FACTS ABOUT MASTER OF LAWS

1

Advanced Law Degree

1-year full-time or 2-year part-time postgraduate programme.

2

Non-Law Professionals Welcome

Designed for cross-disciplinary specialisation, with about 20% of each cohort hailing from diverse non-legal fields.

3

Interactive Pedagogy

Experience a stimulating, multi-disciplinary exploration while cultivating analytical, collaborative, and communication skills.

4

Cutting-edge Curriculum

Incorporating the latest research and best business practices, the curriculum includes study tours to leading companies, organisations, and law firms.

5

Networking Opportunities

Connect with legal, business, and banking practitioners to gain insights into possible career pathways.

Hear About JD and LLM Alumni Stories

Drawn from various national, educational, and professional backgrounds, our JD and LLM students embody the multicultural blend of the Asia Pacific.

As a partner, I communicated with related parties to discuss not only legal issues, but also tax, accounting, finance, and other related business practices. I became aware that what clients wanted were practical legal solutions that informed their business decisions. These experiences encouraged me to learn more about Asian laws, especially when adopting common laws, which are the standard among international commercial transactions. The LLM classes were made up of motivated students from all around the world, many with substantial legal backgrounds. I was glad to be around excellent classmates and teammates, without whom I would not have completed all the tasks that we were required to work on.

Koji Umai (Japan), Class of 2019, LLM Programme
Lawyer, One Asia Lawyers, Indonesia

I opted to pursue the specialisation in 'Cross Border Business and Finance Law in Asia' during my LLM. Over the course of ten months, I acquired a wealth of new knowledge regarding emerging and topical legal fields such as IP Law, international transactions, financial markets, monetary policy, digital economy, fintech, and more. Having come from a Civil Law background, it was an intellectually stimulating experience to be immersed in the Common Law world and its ways of thinking about legal problems. I appreciate the new perspectives that I have acquired as a result of analysing factual matrices according to the relevant laws under both systems.

Lai Yi-Ann (Taiwan, China), Class of 2019, LLM Programme
Partner, Chien Yeh & Associates, Taiwan

Many businesses between Korea and Singapore require Singapore legal advice for construction, shipping, cryptocurrency, and other commercial contracts. There are only a few Koreans able to provide such advice in Korean as one needs to be qualified to practise Singapore law. SMU JD programme formed the foundation of my practice. The curriculum covered the essential theoretical aspects of each area of law encountered in my work. It was also a way for me to meet local practitioners. Group projects were also one of the highlights at SMU that required students to cooperate and bounce off ideas. I was able to make friends quickly and learned a lot from different classmates.

Mimi Ahn (Korea), Class of 2014, JD Programme
Associate Director, Focus Law Asia, Singapore

Be prepared to embrace diversity, as not all of your classmates will be fresh graduates and may have a different impression of university life. The diversity of the SMU JD programme brings colour to the seminar room each day. You will gain invaluable exposure to perspectives that are crucial to the application of law, many of which you may not have considered before. Your JD classmates, with their diverse backgrounds, will further enrich your learning experience. The SMU JD curriculum offers flexibility, allowing you to potentially accelerate your studies and complete Law School in just 2-2.5 years, instead of 3 years.

Leow Jiamin (Singapore), Class of 2014, JD Programme
Partner, WongPartnership

The SMU Juris Doctor programme was an intensive and rigorous education that surpassed all my expectations. I particularly appreciated the focus on classroom interaction, the perspectives of classmates with different backgrounds, and the quality of the experienced faculty, including leading practitioners. It provided an excellent education in the practice of law and was perfect preparation for life first as a Justices' Law Clerk and now as a lawyer in private practice.

Chew Xiang (Singapore), Class of 2012, JD Programme
Partner, RAJAH & TANN Singapore LLP

Master of Laws Law and Technology Interdisciplinary Legal Education In a New Era of Diversification

Recent decades have witnessed the exponential growth of new technologies that will bring about fundamental changes to our society in the decades to come. These technological developments are not only reshaping how legal services are delivered but also calling for innovative legal and regulatory frameworks to promote their positive impacts on advancing social welfare.

The SMU LLM in Law and Technology track is the first of its kind, at least in Asia-Pacific. The new track will focus on three cutting-edge areas of technology development, data transmission, AI application, and blockchain application, as well as their interactions with law, regulation, and public policies. The fundamental objective of this new track is to get legal professionals familiar with the technologies for future legal services, and to forge a common foundation for legal professionals, tech engineers and business players to understand and communicate about a benevolent institutional framework of future technological applications.

ESSEC Business School

ESSEC Business School, Asia-Pacific
5 Nepal Park, Singapore 139408
Tel: (65) 6884 9780, Email: essecasia@essec.edu
Website: www.essec.edu/asia
PEI Reg. No.: 200511927D
Reg. Period: 30 June 2023 to 29 June 2029

Background

A leading pioneer in education since 1907, ESSEC is ranked #7 business school in Europe by the Financial Times and holds the prestigious “triple crown” accreditation from AMBA, EQUIS and AACSB. We offer a wide range of top-ranked programs that provide strong global exposure, professional networks and career outcomes. Students can choose to study in 3 continents via our global campuses in Singapore, France and Morocco. In helping our graduates advance their professional aspirations, we have produced business leaders who helm some of the world’s most influential organizations such as Accenture, PwC, UBS, Chanel, L’Oréal, and LVMH.

Program Highlights

Ranked #1 in Singapore and Asia and among the top 10 worldwide in the QS Business Masters Rankings 2026, our Master’s programs in Finance, Management, Marketing, and Business Analytics offer a powerful combination for career success and global recognition. They also lead in Singapore and Asia for value, employability, and alumni outcomes.

Duke-NUS Medical School

8 College Rd, Singapore 169857
Email: admissions@duke-nus.edu.sg
Website: https://duke-nus.edu.sg

Background

Duke-NUS is Singapore's flagship graduate entry medical school, established in 2005 with a strategic, government-led partnership between two world-class institutions: Duke University School of Medicine and the National University of Singapore (NUS). Through an innovative curriculum, students at Duke-NUS are nurtured to become multi-faceted 'Clinicians Plus' poised to steer the healthcare and biomedical ecosystem in Singapore and beyond. A leader in ground-breaking research and translational innovation, Duke-NUS has gained international renown through its five signature research programmes and 10 centres. The enduring impact of its discoveries is amplified by its successful Academic Medicine partnership with Singapore Health Services (SingHealth), Singapore's largest healthcare group. This strategic alliance has spawned 15 Academic Clinical Programmes, which harness multi-disciplinary research and education to transform medicine and improve lives.

MD Programme Highlights

Duke-NUS Doctor of Medicine (MD) programme embraces a “Clinician Plus” vision, guiding graduates to first become competent and patient-centered clinicians before advancing their other capabilities to become clinician-scientists, innovators, educators and leaders.

Quick Facts Box
Name of Programme: Doctor of Medicine (MD)
Total Cost: For students admitted to the MD programme at Duke-NUS in Academic Year 2026-2027, annual tuition fees are as follows: • Singapore Citizens: SGD 50,050 (GST subsidy provided) • Singapore Permanent Residents: SGD 68,150 (GST subsidy provided) • International Students: SGD 99,900 (inclusive of GST)
Duration: 4 Years

Programme Date: 3 intakes a year, January, May and September	
Admission Requirements: • A UK bachelor's degree classification of 2:2 (lower second-class honours) OR • An equivalent overseas degree recognised by Aston University	
Applicants must also provide evidence of Singapore-Cambridge GCE O-Level Math with Grade C6 or above (or equivalent) For more details, please refer to https://eaim.edu.sg/master-of-science-in-business-and-management/	

PhD Programme

The school's PhD programmes embed students in its five Signature Research Programmes, learning from scientists who are tackling the most pressing healthcare challenges in Singapore and Southeast Asia through basic and translational research.

Quick Facts Box
Name of Programme: • PhD in Integrated Biology and Medicine (IBM) • PhD in Quantitative Biology and Medicine (QBM)
Total Cost: A scholarship covering 100% of tuition and miscellaneous fees payable for the 4-year duration; and a monthly stipend (IBM & QBM)
Duration: 4-5 Years
Application Information
Application Deadline: 15 January
Programme Date: August
Admission Requirements: 3 – 5 references, typically from professors, mentors and/or employers (I) PhD in Integrated Biology and Medicine • All applicants must have completed, or be in the final year of, a bachelor or honours degree (II) PhD in Quantitative Biology and Medicine • Biostatistics and Health Data Science: a master's degree or a bachelor's degree in a quantitative discipline (Statistics/Biostatistics/Math/Computer Science/Epidemiology). • Computational Biology: a bachelor's degree in biological, computational, or quantitative discipline.
With effect from 2026 Intake, standardized test scores such as the GRE are optional for PhD (IBM) and (QBM) applications.
You may still choose to submit your GRE scores, and it is encouraged to do so if you believe it will enhance your application. Evidence of strong quantitative, verbal, and analytical skills through GRE scores, as well as indicators of research skills and experience will significantly strengthen your application.

Masters Programme

Our flexible, stackable Masters programmes are specifically designed for the busy healthcare professional. You gain the power to tailor your education, starting with a single course or a series to earn a professional certification. These certificates can then be stacked to efficiently build a postgraduate qualification. We emphasize hands-on learning and practical application, ensuring you acquire immediately usable skills to advance your knowledge and accelerate your career without interrupting your current practice.

Quick Facts Box
Name of Programme: MSc in Patient Safety and Healthcare Quality (PSHQ)

MSc in Nanotechnology and Nanoscience - A bachelor's degree with honours or its equivalent in Engineering, Science, or related disciplines from an institution of recognised standing - TOEFL iBT score of 90/4.5 or IELTS score of 6.0 (if your degree was not delivered in English) - Relevant work experience is advantageous, and candidates opting to study part-time should preferably be employed in related industries - GRE and GMAT (optional)	

Nanyang Technological University, Singapore Nanyang Centre for Public Administration

South Spine, Block S3.2-B4
50 Nanyang Avenue, Singapore 639798
Tel: (65) 6592 2530/ 2612, Email: NCPA_Englishprog@ntu.edu.sg
Website: <https://www.ntu.edu.sg/ncpa/programmes/overview>

Background

Our English Graduate Programmes are designed for learners at different stages of their career. Regardless of your experience, we will expand your horizons, challenge conventional wisdom, and think critically about the pressing issues of our time. We will provide you with the knowledge and resources to make a meaningful impact, improve decision making and contribute to the betterment of societies, wherever you are.

By incorporating real-life case studies and experiences into the curriculum, our programmes equip students with the most current and practical skills and knowledge to address national issues and stay ahead of the trends.

Programme Highlights

Gain in-depth knowledge on topics across related areas in digital governance, artificial intelligence, decision making, governance, policy design and implementation, amongst others, from one of the best institutions in the world.

Benefit from a holistic learning experience with a rigorous and focused curriculum delivered by a highly curated multidisciplinary faculty. Learn from illustrious faculty members with extensive policymaking and implementation experience, and respected practitioners who are leaders in their field.

Join an extensive global network of more than 20,000 NCPA alumni who hold decision-making positions at all levels of government in their countries, including roles such as ministerial-level leaders, mayors and heads of organisations.

91 Nanyang Ave, ABS-01-029, Singapore 639956
Tel: (65) 6592 8001/ 6908 3470, Email: mba.admissions@ntu.edu.sg
Website: ntu.sg/nbs-mba

Background

Young and research-intensive, Nanyang Technological University, Singapore (NTU Singapore), is consistently ranked among the world's leading universities. Its business school, Nanyang Business School (NBS), is globally recognised for its excellence in business education, with a strong heritage in technology and innovation. NBS was the first business school in Singapore—and the third in Asia—to earn both EQUIS and AACSB accreditations. Ranked #1 in Singapore, and #12 globally in the Financial Times Global MBA 2026 rankings, the Nanyang MBA is an intensive yet flexible 12- to 18-month programme designed to transform professionals into future-ready leaders. The programme cultivates interdisciplinary thinking and empowers participants to rethink business for a sustainable future. Taught by highly sought-after faculty with deep industry experience, the MBA offers a holistic and immersive learning experience. Graduates benefit from close collaboration with a diverse, high-calibre cohort and are well-positioned to thrive in Asia's dynamic economy and beyond.

- NTU ranked 12th globally by QS University Ranking
- NTU ranked 1st in Singapore by QS Asia University Ranking

Programme Highlights

- Highly ranked and globally recognised
- Interdisciplinary and cutting-edge curriculum; reflecting NTU's strengths in technology and innovation.
- A rich ecosystem that supports holistic learning and sustainability.
- Double Degree options: Waseda Double MBA, St Gallen Double Masters and ESSEC Double Masters
- Specialisation: General Management, Strategy & Innovation, Banking & Finance, Business Analytics, Marketing Management, Sustainability & Innovation
- Experiential components include the Leading People Globally module, a “live” consultancy project (Strategy Projects at Nanyang, SPAN), and an Overseas Business Study Mission
- Merit-based scholarships and various grant/subsidy schemes are available for qualified candidates
- Programme duration:
 - Full-time: Nanyang MBA – 12 or 18 months. Waseda Double MBA – 14 months. Nanyang-ESSEC, and Nanyang-St.Gallen Double Masters - 24 months.
 - Part-time: Nanyang Professional MBA – 18 months. The unique part-time format allows working professionals to earn a world-class MBA without compromising their work or family commitments. Classes are held on alternate weekends (Saturdays and Sundays).

50 Nanyang Drive, Singapore 637553
Tel: (65) 6790 6675, Email: tipen@ntu.edu.sg
Website: www.ntu.edu.sg/ntupreneur

Background

Focusing on educating and nurturing leaders for the entrepreneurship ecosystem, our Master of Science in Technopreneurship and Innovation Programme (MSc TIP) empowers participants with competencies to leverage on technology to create social and economic value for society. With emphasis on experiential learning, MSc TIP integrates emerging technologies with innovative business models and practices into its curriculum. The programme covers strategic and operational issues of entrepreneurial ventures at different growth stages.

Throughout the programme, participants have the opportunity to engage with diverse stakeholders in the entrepreneurship ecosystem. Over 2,000 alumni from more than 100 major cities and 30 countries around the world have benefitted greatly from this programme, and many of them have turned their entrepreneurial ideas into successful ventures.

Highlights

- Offered in two language tracks: English and Chinese
- Modelled after the venture creation cycle and with focus on experiential, hands-on learning, the programme welcomes students from diverse academic disciplines, industry backgrounds, and nationalities.
- Opportunities to engage with academics, entrepreneurs, and industry practitioners including intellectual property (IP) lawyers and venture capitalists etc.
- Know-how to commercialise business ideas and technologies, including translating research outcomes into viable ventures.
- Access networking opportunities across the entrepreneurship ecosystem for first-hand insights to succeed in the business world.
- Flexible learning pathways available through the FlexiMasters programme.

Tel: +65 6592 1136, Email: Adm.Postgrad@SingaporeTech.edu.sg
Website: <https://www.singaporetech.edu.sg/admissions/postgraduate>

Background

Singapore Institute of Technology (SIT) is Singapore's University of Applied Learning, offering applied degree programmes targeted at growth sectors of the economy. With a mission to nurture individuals who positively impact society, SIT aims to be a leader in innovative learning by integrating learning, industry, and community. Our postgraduate programmes enable students to develop specialist knowledge and skills relevant to the industry, providing the opportunity for graduates to become Chartered or Professional Engineers in their field.

Programme Highlights

The Singapore Institute of Technology (SIT) Master of Science in Civil Engineering is a practice-oriented programme designed to equip engineers with advanced knowledge and industry-relevant skills that can be applied directly in professional practice. Emphasising SIT’s applied learning approach, the programme bridges theory and real world engineering challenges through industry focused coursework and practical applications. The key areas of specialisation are Structural Engineering and Geotechnical Engineering, enabling participants to deepen their technical expertise in critical disciplines of the civil engineering sector. The programme is tailored for working professionals, with evening classes that provide flexibility for balancing career commitments and postgraduate studies, while supporting continuous professional development and career advancement in the built environment industry.

COLLEGE OF ALLIED EDUCATORS

College of Allied Educators, SSG PES/LENI/GST Reg. No: 200000690M
ERP Registrations From 28 Jun 2025 to 27 Jun 2026.

Preparing you for a new future!

College of Allied Educators is a four-year EduTrust-certified institution, upholding the highest standards in academic quality, professional excellence. CAE prepares our students for the modern work environment through our accredited* postgraduate programmes and our academic partnerships from the UK.

- ▶ Doctorate of Counselling Psychology (YSJU)
- ▶ Master of Business Administration (YSJU)
- ▶ Master of Science in Corporate Governance (LBU)
- ▶ Master of Science in Applied Psychology (AU)
- ▶ Master of Science in Counselling Psychology (AU)
- ▶ Postgraduate Diploma in Counselling Psychology *SAC-recognised, validity: 31 Jan 2025 to 30 Jan 2027
- ▶ Postgraduate Diploma in Special Education (E-Learning)
- ▶ Postgraduate Certificate in Therapeutic Play Skills (APAC-PTUK)

SUTD | OUR PG ALUMNI AND STUDENT

Dr. Matthew Yeo Soon Kiat

Alumni of SUTD PhD - Engineering Product Development (April 2024)
Currently a Research Fellow at the Singapore University of Technology and Design (SUTD)

Why did you select SUTD for your postgraduate studies, and what distinguished it from other options?

SUTD provided a unique multidisciplinary learning environment during my undergraduate studies, particularly through our design projects*. The integration of architecture and robotic engineering at SUTD allowed me to deeply engage in research on robot ergonomics. This experience offered valuable insights into developing spaces that are inclusive of robotic systems. I am very fortunate to have Associate Professor Mohan Rajesh Elara, a leader in the field of robotics, as my PhD advisor and my research topic was closely related to some of his work.

Other universities would focus on either specialisation or have limited resources for the specific industry. This would not have enabled the wider access to robots or zones for deployment and testing as I had in SUTD.

*Design experiences are incorporated within and outside the SUTD curriculum - within subjects, cutting across subjects, across academic years and projects driven by students.

What opportunities or changes did you experience after completing your PhD?

I have unique opportunities and access to both the architecture and robotics industries, allowing me to apply niche insights that other graduates may not possess. In terms of robotics engineering, I am now able to provide robotic deployment knowledge in architectural zones. With my Master of Architecture experience, I am well placed to provide architectural insights on how zones can be improved for robot productivity, such as area coverage (e.g. robotic cleaning operations), or optimised waypoint navigation for the highest visual coverage (e.g. robotic security/surveillance).

He Junbo

Student of Master of Science in Technology and Design (Sustainable Product Design)

How has the MTD programme redefined your educational experience?

I completed my bachelor's degree at California State University but pursuing the Master of Science in Technology and Design (MTD) at SUTD has truly redefined my educational experience. SUTD places a strong emphasis on practical, real-world problems, focusing on enhancing students' problem-solving abilities. The university integrates multiple disciplines seamlessly, and "design" at SUTD extends beyond traditional art or industrial design to emphasise innovative design methodology. This aspect intrigues me and inspires me to want to learn more about it.

How has your learning experience at SUTD influenced the way you solve complex problems?

As a computer science graduate, my current post-grad research spans medicine, IoT, signal processing, and algorithms, which I find incredibly fascinating. The exposure to design methods and sustainability at SUTD has broadened my perspective, especially in the full life cycle development of products. The application of design thinking in engineering has equipped me with a holistic approach to tackling complex problems, ensuring that solutions are not only technically sound but also user-centric. This unique approach has enriched my academic journey and provided me with invaluable skills not only for my future career, but also in my personal life.

Singapore University of Technology and Design

SUTD is Singapore's fourth autonomous university and one of the first universities in the world to incorporate the art and science of design and technology into a holistic interdisciplinary education and research experience. SUTD students thrive in a design-steeped environment and are encouraged to think creatively and innovatively to solve real-world problems. We leverage on the power of deep tech like artificial intelligence to bring to life human-centric solutions using design and technology.

The Business School
for the World

Discover the MBA that stands for excellence

The INSEAD MBA equips you
with the skills businesses need
in a volatile world. But you also
gain much more than that:

- ▶ One-year MBA with immediate impact
- ▶ Multi-campus experience across Europe, Asia, the Middle East and North America
- ▶ Global community: 73,000+ alumni
- ▶ Class of 2025 employed across 55+ countries
- ▶ 170+ scholarships available

#2 GLOBAL MBA

Furthering your education can open up opportunities and change your future. Unlock your potential for a better future with the OCBC Education Loan.

- Interest rate at 4.5% p.a. with a 2.5% processing fee (EIR is 5.17% p.a.¹)
- Loan of up to 10 times your monthly income or S\$150,000 (whichever is lower)
- Choose from three flexible repayment options with a tenor of up to 8 years

¹Effective Interest Rate (EIR) is assumed on a 2-year course with repayment period of 8 years and Standard Repayment Method. The EIR comprises of 4.5% per year interest rate which is calculated on a monthly rest basis and 2.5% of processing fee of the approved loan amount that is applicable upon disbursement of loan.
